## About

*I am a hard-working professional with positive attitude and plenty of enthusiasm for my job. I have completed my Master degree in the field Computer Science from PUCIT, University of Punjab, Lahore.*

*Through my learning I have practised the complex problems and solved them in much efficient manner. I have learnt advance web development technologies and I am ready to bring those to a new opportunity.*

## EDUCATION

- **Master of Computer Science**  
PUCIT, University of Punjab Lahore, 2020
- **Bachelor of Science**  
University of Punjab Lahore, 2016-2018
- **Intermediate**  
BISE Lahore, 2013 - 2015

## EXPERTISE

.Net:	██████████
.Net Core:	██████████
SQL Server:	██████████
Web APIs:	██████████
Bootstrap:	██████████
HTML & CSS:	██████████
Java Script & jQuery	██████████

## Projects:

### Eazisols

- **Eazi Scrapper (Company Project):** A Web and Desktop application, built in ASP.NET. I have implemented its backend and front end with the team.
- **Point of sale System (Company Project):** An Ecommerce web application built in ASP.NET. I have implemented Front end and Backend of this Application.
- **Bug fixer Project from Client:** A project from client in which he has some issues with his project and I have fixed the bug from his project using Asp.net. C# technology.

### W Group

- **Wooso Platform:** In W Group I have implemented platform of Wooso with development Team. I have work experience on Back-end Development. It's a calling app like zoom. <http://wooso.world/>
- Working for Ethereum SDK and some implementations for coins.
- Working for lite coins implementations

### AMMAG Technologies:

- Deploy Terra coin Smart Contract Address.
- Working on Quantum Blockchain
- Working on Ethereum, Binance and Terra blockchain
- Working on Asp.Net Core APIs

## Additional

### Functional Areas:

Software & Web Development, Database Development, SQA and AWS.

### Interests:

Book reading, Gaming and Programming

### Reference:

Will be provided if required.

# Academic Experience

## PROJECTS

### Final Year Project:

- Maintenance Port

The Project was based on taking the Handyman services on a few clicks. It is a web-based application that has 3 types of users i.e. Clients, Workers and an Admin to manage different things. The clients can make appointments for the required services and can choose worker according to the different criterions like nearest worker to their location, service charges, performance-based work reviews and a bit more. The workers are able to respond them in real time and then they can update their profile with the projects they have completed by uploading different pictures or videos to the website. Admin can manage reviews by users and will manage projects of the workers to provide authentic information which is the most important aspect as far as clients satisfaction is concerned.

### Term Projects:

- Zoo Management System
- Developed a "School Management System" in master's 2nd semester using Xampp & Html, css, javascript, Bootstrap.
- Developed a "Restaurant Management System" in master's 1st semester using C++.
- Developed a "Tic Tac Toe" in mater's 2nd semester using C++.
- Developed a "HR Management System" in master's 3rd semester using java.

## SKILLS

- Asp.Net
- Asp.Net Core
- Web Forms
- SQL Server
- Web APIs
- HTML, Bootstrap and CSS
- Java Script & jQuery
- Flutter

## Languages

- Urdu - Native
- English - Good

## CERTIFICATION

### Web Development

Khyber College, Sheikhpura, 2019
