### Software Quality Assurance Engineer / SQA Engineer

Tetralogix (Pvt) Ltd. | Lahore, Pakistan

Nov 2022 - Present

- Testing of the web as well as mobile applications.
- Bug Reporting.
- Create Test Cases for assigned features.
- Coordinating process audits and reporting to the manager.

I have worked on numerous Shopify projects there. And I have performed these testing manually at Tetralogix.

- UI Testing.
- Functional Testing.
- Exploratory Testing.
- Cross-Browser Testing
- Execute Smoke and Regression Testing.
- Compatibility testing.

## Projects

### Cricket Rising Star Platform

Final Year Project

Tools: Visual Studio, HTML5, CSS3, PHP, MySQL

We developed a web-based project in which a user can register his team to play a tournament. Then they could be able to get notifications about their schedule of matches and location from our system. At the end of the tournament, there would be a man of the tournament who'll get the reward of PKR 15000 from our tournament sponsor.

### Hospital Management System

Semester Project

Tools: MySQL, PHP, Visual Studio

It includes the registration of patients, their appointment with doctors, and storing of their details in our system. Our system provides each patient with a specific ID through which they can check the availability of doctors. On our system, the data can only be entered by the Administrator or Receptionist.
