EDUCATION

Computer Engineering, Bachelor of Science

January 2013 – January 2017

Sir Syed University of Engineering and Technology, Karachi, Pakistan

CGPA 3.43/4.0

Graduated in BS (CE) program. Studied Computer Engineering with major focus on Software Development, Computer Networks and Hardware. Courses included were Software Engineering, Database Management System, Data Structures and Algorithms, Computer Networks, Object Oriented Programming, High Performance Computing, and Concurrent and Distributed Systems.

PROJECTS

- **DiRe-SOS:** Disaster Relief Smart Online System (DiRe-SOS) is my final year project. The core idea behind the project is Natural Calamities cannot be avoided best efforts can be done to minimize the effect of these disaster. Mismanagement results into more damage of human life than the actual disaster. So our system will help in managing post disaster chaos so that another disaster doesn't occur after the natural disaster due to human mistake.
- **News App:** This is a mobile application built on Ionic 4, Angular 7 and Typescript. This is an application where news render from different news sources, I use google news APIs for news source.
- **PohnchaDo.pk:** This is a startup of Foods, Groceries, Vegetables and Fruits delivery service. Currently this is operational in Karachi, I developed Customer, Admin and Rider mobile apps and also developed and Admin panel to manage all the operations of the service.

Database Technologies

Microsoft SQL Server
MySQL
SQLite

NoSQL Database Technologies

MongoDB

Version Control

SVN
GIT
