Shrink Tracking
.NET, C#, SQLite, Xamarin Forms
(September 30, 2022 - November 30, 2022)

Shrink tracking for all products in the store. Captures user, UPC/PLU, reason, amount, date/time and more. Categorizes shrink by reason, by department, and more for analytics. Daily and weekly reporting of shrink by department, reason, UPC or PLU. Measures the e ectiveness of the store's markdown program. Includes departmental and store transfer tracking as well as recording waste

Grind Logs
.NET, C#, SQLite, Xamarin Forms
(November 03, 2022 - February 08, 2023)

G.O.T. has the best tool on the market to quickly and easily capture information to meet USDA/FSIS grind log regulations. We make this process e cient and painless, backup your data, and provide all hardware and software for one low weekly fee. BONUS: the system allows you to quickly and accurately do a physical inventory of your fresh meat coolers, making it easier for you to manage your product orders and rotation.

Ordering
.NET, C#, SQLite, Xamarin Forms
(January 01, 2021 - Present)

Choose from many di erent types of ordering applications to ensure your shelves are always fully stocked!

Con rmation Order
.NET, C#, SQLite, Xamarin Forms
(November 08, 2022 - December 23, 2022)
Verify Order Placed Order of con rmation.

Invoicing and Billing Application
.NET, C#, SQLite, Xamarin Forms
(January 04, 2023 - Present)

Invoicing and billing application for di erent business purposes helps mainly the service providers to manage, send professional invoices online and track their status. Generally, all the small companies in Pakistan facing various issues in managing and tracking the invoice status of customers, which mostly back to the lack of adapting new technology in these companies. One of these lacks is tracking the status of the bill for de nite projects.

Distributor Invoicing system
.NET, C#, SQLite, Xamarin Forms
(March 10, 2023 - Present)

The Faiza Management App will be created for retailers who sell Faiza products. This App is created to track the number of sales and stock still available in our retail store and is user-friendly for everyone who is going to use it.
Using this app, you may add items to your cart or edit the added items from your shopping list. The app will then generate a total bill for all of your purchases and calculate the discount you will apply to the retail price.

Employee Attendance App
.NET, C#, SQLite, Xamarin Forms
(March 12, 2023 - March 17, 2023)
The purpose of this app is to track employee attendance.
