Overview: To honor veterans, the system allows Americans to participate in fundraising, volunteering, or donating to WAA events and projects.

Team size: 20 developers

Technology stack:

`AngularJs` `NodeJs` `MongoDB`

CASE STUDY

3. VIRTUAL TOUR GUIDE

Overview: With two roles: operator and general user, this web system allows video calls, voice calls, and screen sharing in real time. Unlike the general user, the operator does not turn on the camera on his/her face, but instead launches an avatar that simulates the user's behavior and provides guidance to the user.

Team size: 23 developers

Technology stack:

`React.js` `Skyway` `WebRTC` `Node.js`

4. FAMILY COMMUNICATION APP

Overview: Due to the COVID-19 outbreak, family members couldn't be in contact. This app was developed for use in hospitals in the US and Israel Family members can easily contact each other with some important features: online video calling, night mode, privacy mode, and other remote control functions.

Team size: 8 developers

Technology stack:

`React.js` `React Native` `Jitsi-lib` `Node.js` `Pusher(socket)`
