Hardikkumar Nai

Contact No: - +919725960834
Email: Hardik.nai92@gmail.com
Skype ID: hardik.nai92

Summary:

- 8.0 Years Experienced in ReactJS, Redux, Redux-thunk.

- lerna tool use for managing JavaScript projects with multiple packages.

- Eslint for linting and Flow for type checking use
- write different test cases like Structuring Tests, Unit tests, Mock test, Integration

  Tests,Component Tests, Testing User Interactions, End-to-End Tests

- Able to work independently with little to no supervision as well as functioning as an excellent

  team Leader.

- Experienced in create react on base adobe xd, Zeplin
- tracing and debugging any existing code in the development and production environment. •

  team handles based on deadline and requirements. divide work and create separate tickets in

  jira and assign them to developers. collect work base on ticket id in git and review code base on

  coding standard and business requirement merge code to develop branch

- Plans, coordinates and executes development activities within the scope of individual projects

Technical Skills :

- **React Js**
- **Redux**
- **LernaJS (MonoRepo)**
- **Material UI**
- **Fluent UI**
- **Chakra UI**
- **React Bootstrap**
- **React Testing Library**
- **Storybook**
- **Knockout.js**
- **Javascript**
- **Bebal**
- **Jest**
- **Enzyme**
- **Mocho**
- **Chai**
- **Webpack**
- **HTML 5**
- **CSS 3**

- **Bootstrap framework**
- **Jquery**

Education:

- MCA in Information Technology (2015) from Gujarat Technological University with 7.77 CPI.
- BCA in Information Technology (2012) from Hemchandracharya North Gujarat University, with 68.57%
- HSC commerce (2009) from GSE Board with 62.43% marks
- SSC (2007) from GSHSE Board with 58.62% marks

Achievements:

- 1st Runner up codeX & Error Detection state level programming competition in TECHTUNE-2014 held at NSIT Jetalpur, Ahmadabad.
- 1st Consolation prize Business idea competition in 2014 held at L.J.K A(e)entrepreneur The Business Incubator, Ahmadabad.
- 1st Runner up in code zilla state level programming competition in TECHTUNE-2014 held at Vishwakarma Government Engineering College , Ahmadabad.
- Attended seminars on PHP and ethical hacking.
- 96% in Java Online course of www.edX.org site held at Hong Kong University.
- Oracle Certified Associate Java SE 7 Programmer cracked on 14 March 2016.
- Oracle Certified Professional Java SE 7 Programmer cracked on 10 May 2016.
- 100% in Linux Online course of www.edX.org site held at Linux Foundation**.**
- Awarded as traditional dress for man at the 2015 in Spec Diwali Function.
- Help in many projects in different languages like PHP, .NET, C, C++, Arduino, Java, android.

Professional Experience:

Project Name: Valera health
Company: Xpanxion International Pvt Ltd
Tenure Period: 27-01-2022 to 04-11-2022
Technologies: Reactjs, Redux, Redux-thunk,
Job Responsibility –

Developing front in React for web application and using styled-component for reuse css and use react-hook for js code reuse I can review code and give suggestions to Junior developers and manage jira task id base git branch.

 I have a good grasp of client-side react components as server side components.
We develop our own components and reuse code throughout the application. to manage one place change effect in place.
Manage state of component in using redux use middleware redux-thunk for rest api integration
write test case in Jest Js for React component.

I am able to audit websites for speed performance and recommend the necessary solutions.

Project Name: Collector 360
Company: Great Software Laboratory Pvt Ltd
Tenure Period: 27- 04-2021 to 29-12-2021
Technologies: Reactjs, Redux, Redux-thunk,
Job Responsibility –

Project Description –

      We develop E-commerce sites using microservice architecture.
      Integrated with Amazon pay , credit card , debit card payment method.
      In Shipping we communicate with third party vendors and integrate rest API in nodejs.
      I have converted the rest API to graphql API.
      We are integrated with the JWT auth token.
      The Majority of api are secure so we authentication token every API request call.
      We are sent notifications to users using email as well as sms.
      In mail we write a mail template pug file and pass the dynamic value from the database.

Project Name: BRM
Designation – Sr Software Engineer
Tenure Period – 18-Feb-2019 to 21-Feb-2020
Technologies: Reactjs, Redux, Redux-thunk, node
Company: Sterlite Technologies Limited
Job Responsibility –
    − Develop front in React for web application
    − manage state of component in using Redux use middleware redux-thunk
    − write Rest api in node js using express js framework and writing test case of Chaijs, Mochajs **–** write test case in Jest Js for React component.

Project Description –
It is a Telecommute product**.** I am part of the BRM and CRM module. This product sale to vodafone, idea,

JIO ,airtel. In different countries.

    Project - firstai
▪ **Duration:** OCT 2017 – JUN 2018
▪ **Technologies**: ReactJS, Redux, NodeJS
▪ **Company**: Rays TechServ Private Limited

    ▪ **Description:**
    – Its web application provides service to the third party of the
        financial capital market .
    − **Responsibility:**
− Write an API to communicate using JSON and test using postman.
− Develop GUI in call ReactJs
− Communicate to clients from the US and maintain API documents.
– Take GIT update, code review, commit.

    Project - ArtisionHub
▪ **Duration: JAN 2017 – July 2017**
▪ **Technologies**: **ReactJS, Redux**
▪ **Company**: Spec india Pvt Ltd

    ▪ **Description:**
    – Its web application provides service portals for different service
        men like (Barbar, Mechanical, Civil Engineer, Carpainter, Painter).
    − **Responsibility:**
− Write a Restful web service to communicate using JSON and test using postman. −
writing front UI in react and design using bootstrap.
– Take SVN update, code review, commit.

    Project - Order Management System
▪ **Duration: JAN 2015 – July 2017**
▪ **Technologies**: **ReactJS, Redux**
▪ **Company**: Spec india Pvt Ltd
▪ **Description:**

- It is a comprehensive application software developed for SPEC-INDIA clients.
- OMS is the application that provides the user a way through which internal orders or customer order can be created in the most efficient and accurate way.
- Also for plant warehouses this application provides functionality like trip building (an activity of building a trip of a truck to deliver products to multiple distribution centers according to their internal order or customer order). - When an order is shipped OMS calls the IM application to reduce the inventory of the plant warehouse and increase the inventory of the Distribution Center.

▪ **Responsibility:**
− Gathered Requirement from Client side Team.
− Documented details of project and coding standard.
− Development of requested functionality, Perform Unit testing and end product delivery to the QA. − Worked on complete project lifecycle on application software development including Understanding the requirements, design, coding, bug fixing and expedite deadlines.
− Involved in end to end development of the Project.

Project - Billing Management System
▪ **Duration: JAN 2015 – July 2017**
▪ **Technologies**: **ReactJS, Redux**
▪ **Company**: Spec india Pvt Ltd
▪

▪ **Description:**
- It records all the legal document or delivery note transactions and maintains the details about the billing.
- Billing modules keep record of the amount transaction done by the OMS System or also we can say the value transactions.
- It generates decision making reports like sales reports, Net sales reports. and provide API to OMS

− **Responsibility:**
− As above, OMS project responsibility.

Project - Policy Management System
▪ **Duration: JAN 2013 – June 2013**
▪ **Front end : C++**
▪ **Backend: File System**
▪ **Tool: Microsoft Visual C++**
▪ **College/Company**: L J institute of engineering and technology

▪ **Description:**
- Manage all policies, hold registration, selection based on requirements like age, withdraw pried select different plan and calculate premium, duration, total amount of policy.
- Generate card of happy birthday, happy anniversary and print premium receipt.
- Generates report like total premium income base on day, month and year. Pay for the policyholder the whole amount based on different scenarios, month and year. pay for agent commission per policy and other kinds of reports.

- **Responsibility:**
– Analyze the whole system manually. And prepare questionnaires for agent, policy holder, manager – Make a document draw UML diagrams like class diagram, DSD, data dictionary, use case diagram, activity diagram, sequence diagram.
  - Write code in C++ and manage code, migrate code, maintain versions of code and maintain files based on structure.

- ▪ **Project - Railway Inquiry System**
- ▪ **Duration: June 2012 – JAN 2013**
- ▪ **Front end : C**
- ▪ **Backend: File System**
- ▪ **Tool: Turbo C++**
- ▪ **College/Company**: L J institute of engineering and technology

  - ▪ **Description:**
  - With the help of this user can book a seat and generate the ticket.
  - Passengers can search train on different criteria like the day, between the station, type of train and show the train stop, check free seats and generate total booked seat reports.
  - **Responsibility:**
– Analyze the whole system manually. and prepare questionnaires to the ticket issuer, passenger. – Make a document that draws UML diagrams like class diagram, DSD, data dictionary, use case diagram, activity diagram, sequence diagram.
– Write code in C and manage code, migrate code, maintain version of code and maintain file based on structure. – Write an algorithm to check train schedules on a platform.
         Check availability of seat

- ▪ **Project - Madhvi Dairy Product Management System**
- ▪ **Duration: June 2011 – May 2012**
- ▪ **Front end : PHP**
- ▪ **Backend: MySql**
- ▪ **College/Company**: SKM BCA College, Kanodar
- ▪ **Server: Apache**

  - ▪ **Description:**
  - Manage product, branch account, order process. The customer sees the latest menu and manages the order using contact form.
  - **Responsibility:**
– Analysis of the existing system. and prepare questionnaires' to shopkeepers, problem occur to handle existing system
– Make a document that draws UML diagrams like class diagram, DSD, data dictionary, use case diagram, activity diagram, sequence diagram.
– Write code in PHP and manage code, migrate code, maintain version of code.

Personal Details:

Date of birth : 1ˢᵗJune, 1992

Place of birth : Ahmedabad

Sex : Male

Marital status : Married

Nationality : India

Current Residence : D/103, Shree Ugati Elegance, Opp Utsav Valley, Near Vishala LandMark, Palm Hotel Cross Road, Sardar Patel Ring Rd, Nikol, Ahmedabad, Gujarat 382350

Permanent Residence : 79 Naivas, At.Post : Change, Tehsil : Vadgam, Banaskantha, Gujarat, 385520
