Projects

Magnfi (May 2020 – Present)
TOOLS: PHP | Web API | Slim | MySQL | Aurelia | AWS

It is a video marketing solution. Magnfi automatically produces and professionally brands your video reviews, brand videos, video emails, video testimonials and video surveys.

Magnfi provides white label solution. It has more than 50 white labels.
URL: https://magnfi.com/

Roamina (March 2020 – Present)
TOOLS: Ionic | AWS Serverless framework | Angular | DynamoDB | AWS

Roamina is an AI powered application putting you in charge of your data. With just a few clicks, you can begin to unlock the value of your data safely and securely. Roamina automatically organizes information to save you time and then analyzes it to find ways to save you money.

URL: https://www.roamina.com/

PCBC Business Center (Jan 2011 – Present)
TOOLS: PHP | jQuery | CodeIgniter | Laravel | MySQL | AWS | WordPress

It is also a CRM/ERP product. It is built for ProCamps. We automate all their business processes including payment, camp management, registration, reporting, product selling, inventory management, coaching staff management. It has more than 50 event specific websites which are mostly build using WordPress. We also build a mobile app for it.

We also have built a public website for this company and an e-commerce solution for it. More than 30K campers registered against more than 300 camps every year.

ProCamps Worldwide is an international event management company that assists professional athletes in the National Basketball Association, National Football League, Major League Baseball, and Women's Professional Soccer with the development of their personal sports camps and related events. It also manages and organizes online events.

URL: http://www.procamps.com

Career Placement Portal for University of Cincinnati (May 2014 – Aug 2014)
TOOLS: PHP | jQuery | CodeIgniter | SQL Server

We have built a career portal for the students of the university of Cincinnati to manage their profiles and share it employers to overcome the process of manual resume collection and send it to different employers.

URL: https://lcbwebapps1.business.uc.edu/

AV Business Center (Aug 2009 – March 2015)
TOOLS: PHP | jQuery | CodeIgniter | MySQL

It is a CRM (Customer relationship management) product. It is built for Advertising Vehicles (AV). This application handles Sales, Inventory, Order, HR, Media library & calendar of the organization. AV is one of the leading national companies in the USA in vehicle wraps and mobile outdoor marketing.

URL: http://www.advertisingvehicles.com

Subscription DNA (Aug 2007 – Dec 2009)
TOOLS: PHP | jQuery | MySQL

It is subscription billing and membership management system. It is the enterprise server platform automates the subscribing and expiring of users to your services, members and their subscriptions, processes all recurring billing and on-demand billing, and even authenticates members to your premium content. With our robust reporting tools you can communicate with target user groups, quickly mine and analyze numerous reports view transactions; send customizable email auto responses, track member login usage and statistics and much more.

URL: http://www.subscriptiondna.com

Complaint Management System (Feb 2008 – March 2009)
TOOLS: PHP | jQuery | Oracle 11

This application is specially designed for the call center to log their complaints & their progress & status. It provides powerful analytics and reporting capability with graphical dashboards helps managers to perform trend analysis and spot recurring problems to drive root cause analysis in a timely manner. It is deployed at PRAL (Pakistan Revenue Automation (Pvt.) Ltd), SNGPL, VT (Vehicle Tracking (Pvt.) Ltd).

VisionMaster
TOOLS: C | C++ | SQL Server

I work on different modules of the VisionMaster software. VisionMaster is a line of systems based on proprietary hardware and software components. These systems are used for statistical process control in manufacturing and fabrication environments to monitor solder paste printing processes in SMT (Surface Mount Technology) printed circuit boards.

Human Resource Management
TOOLS: PHP | JavaScript | MySQL

Develop a human resource management module for Delta Indus Systems which is added in webERP an open source ERP System.

Attendance Systems
TOOLS: C++ | MS Access

This is a Fingerprint based attendance system. I use MS Fingerprint Reader and Griaule GrFinger Biometric SDK to implement this system and integrate it with the existing online system.

SharpCMS
TOOLS: PHP | JavaScript | MySQL

I work on SEO, Navigation, and Shopping Cart and Calendar modules of the SharpCMS a Content Management System (www.sharpcms.com).

News Bar Reader (Final Project)
TOOLS: VB.Net | Text to Speech Tool

This application is related to Video Processing and Text to Speech Conversion. It provides the service to the people that they listen to the scrolling news on a TV screen instead of reading. I am a group leader of this project.
