OBJECTIVE

Developer and designer practicing React and Node for more than two and half years, I also have development experience on the entire JavaScript based application as a full stack developer including, react native, node, aws, etc. I am currently a software architect and remain passionate about new technologies in general. Particularly interested by the new uses and the opportunities that can bring the effective and user-friendly solution to the end user, I wish to pursue my career on solving business complex problems using the technology in the faster and innovative way.

EXPERIENCE

International Exchange Program (2019)

Laurential University, Sudbury, Canada

The goal of program was to see the change in the methodology of teaching as well as explore the culture of Canada as a Computer Engineer. They taught Mobile computing and Wireless Communication as well as Web Data Management during the interval of 45 days.

React and Node Developer (Jun 2019 – Jan 2020)

RejoiceHub, Surat

It was my first job experience after completion of my studies. As of I have learn many new thing regarding the front end developing as well as backend developing. I also got acquainted with the project environment and also the company's environment. This was a startup company and therefore working over this place made me acquainted with many technology such as JavaScript, HTML, CSS, React, React Native, AWS Services, DevOps, etc.

React Team Lead (Feb 2020 – Jan 2022)

SRKAY Consulting Group, Surat

In a corporate company I came across different challenges which gave me vast knowledge and power to solve any problem. This company had taught me many new coding style and structures. I used to lead the React Technical team, gather requirement from the client and convert it into productive output.

EDUCATION

Aug 2016-
2020

Bachelors of Computer Engineering, Gujarat Technological University (Sarvajanik college of Engineering and Technology)

During my studies I acquired vast knowledge regarding different languages. After my final result I have 8.77 CGPA score out of 10.

SKILLS

Frameworks	<i>React Native, React.Js, Express</i>
Databases	<i>MySQL, MongoDB, Elastic</i>
Development Tools/Environment	<i>Visual Studio Code, Git, Azure, AWS, Jira, Slack</i>
Operating System	<i>Mac OS X, Windows 7/8/10, Ubuntu</i>
CI/CD	<i>Jenkins, Gitlab CI/CD</i>
Others	<i>Micro Service Oriented Architecture, Agile, Scrum</i>

PROJECTS

Disgo

Role: Front end React.Js Developer

Description: This was a social platform project for a USA Client. We started it from scratch and build it into final output. In this product the user can add events and provide reviews regarding the event they visited. Ask friends to attend the event and provide reviews regarding it. Currently the project is live and used by hundreds of user in USA.

Technology: We used HTML5, SASS for CSS, and Redux for maintaining the states. The backend was created in node with mongodb as database and application in flutter by other developers in the team.

Lotus

Role: Front end React.Js and Backend Node Developer

Description: This is a jewellery showcasing catalog website. It was created by us for the Lotus group of Gems and Jewellery. There were two websites created one for the admin panel management and another for the clients who can check jewellery catalog and respond the admins with their wish listed product in the cart.

Technology: Reactjs, Nodejs, Mongodb, AWS, HTML5, SASS, Redux, Hooks and express

LevyElectric

Role: Backend Developer

Description: This is the product of electric scooter on rent. It tracks the users ride in the city. It costs according to the kilometers driven by the user. My role in the project was to create and run lambda functions to synchronize data in airtable and dynamodb.

Technology: Nodejs, Mongodb, AirTable, Dynamodb, AWS lambda functions and express

SRKONE

Role: React Native Developer

Description: After joining the SRK Consulting Group, because of my experience in React I was asked to start as a React Native developer. Due to my great grip in learning and understanding the requirement I took the lead in React Native team. SRKONE is the app for diamond selling with different features for attracting the client. Few of the features are like searching the diamond with criteria selected, event creations like diamond at your price, Bid to Buy, worldwide shows like Hong Kong Show, Las Vegas Show, etc. Adding precious stones to basket and confirmation of buying the stone.

Technology: React Native, Redux, Thunk, Realm Database for app, firebase for notification, offline stones, sharing stone details in different platforms like whatsapp, mail, etc.

The application is live in app store and play store named 'SRKONE'.

PureGo

Role: React Native Lead Developer

Description: This was another application, we created for the internal users in the company. This app was to keep the stone data stored and trace its availability and department in which the stone is processing. It also kept the track of the party registered in SRKONE app that buys the stones, prices and stones which party can see and buy. It used React native for developing the application in android and ios. I have started this project for the company from scratch and lead the team of five developer to build it and provide it to the client on time. We kept different environments like dev, qa, stage and prod to manage its configuration and used to build app according to required environment.

Technology: React Native, Hooks, Redux, Thunk, Realm Database, firebase

Custom Application

Role: React Native Lead

Description: This app was to trace the records of stone that are exported to client. While exporting the stones it takes several steps such as export done in India, International exports done, export received by the party, etc. It also used to manage imports from other countries which have been exported and returned back. It was also created in React Native and lead by other developer in the starting but when he left the responsibility was provided to me to manage the workflow of the app and keep it running.

Technology: React Native, Redux, Thunk, Firebase

STRENGTH

- ∟ Positive Attitude
- ∟ Quick Learner
- ∟ Team Player
- ∟ Self Motivated

ABOUT ME

I enjoy traveling and eating my way around the world, listening pieces of music, and talking about the future of autonomous vehicles, Internet of Things, Artificial Intelligence, Possible next-gen technologies trends and how we can change the technologies. So if you ever want to bounce ideas off of me, please feel free to contact me.
