## Summary

As a Cloud Applied Generative AI Engineer, I am pioneering Strategic AI Solutions for Enterprise Transformation and Business Growth.

My journey from leading a Successful Writing & SEO Agency to becoming a dedicated GenEng has been fueled by a passion for transformative technology and a commitment to continuous learning.

### Key Achievements:

- While Learning become part of the Team that have developed LMS for "Governor Sindh Initiative for AI, Web 3.0 & Metaverse".
- International AI Hackathons: Led a team to the top 25 ranks, showcasing our innovative approach to problem-solving and AI application.
- Generative AI MVPs: Developed minimum viable products for clients, demonstrating the practical value of AI in real-world scenarios.
- Career Transformation: Transitioned from a successful career in writing and SEO to mastering cloud-applied generative AI, reflecting my adaptability and drive for tech mastery.
- Worked as Fronted Engineer at a Korean Startup to develop their platform.

### Technical Proficiency:

- GenUI & Frontend Development: Expertise in Typescript, NextJS, React, and Tailwind CSS, with a focus on creating intuitive user interfaces using the latest Vercel AI SDK v3.0.
- Backend Engineering: Proficient in Python, FastAPI, and SQLAlchemy, with a strong foundation in Postgres SQL for robust API development.
- GenAI Solutions Development & Integration: Deep experience with Langchain, OpenAI SDK including Assistant API, Completion API, and custom GPT models, leveraging vector databases like weaviate, Pinecone, Langchain tools and Transformers to build intelligent systems.
- Cloud Architecture: Skilled in deploying scalable solutions using Vercel, Docker, Kubernetes, and serverless containers, with proficiency in CI/CD pipelines through GitHub Actions and infrastructure as code with Terraform.

I am eager to collaborate with startups and established businesses to create AI-driven web apps and API-first microservices that lead to measurable business outcomes.
