- I am having around 3 years of experience as a full-stack developer. I have worked on Java and react js-based web applications.
- On the Backend side I have worked and knowledge of spring, spring MVC, spring boot, spring-security, spring data JPA, hibernate, core java, microservice, and spring cloud.
- On the front side, I have worked and knowledge of react js framework by creating a pure component, HOC component, routing, bootstrap, and redux-based web application.
- On the DB side, I have worked on the MYSQL, and PostgreSQL, litter bit of experience in MongoDB as well.
- Highly adaptable in quickly changing technical environments with very strong technical, organizational and analytical skills.
- Quick learner, eager, and able to rapidly learn new APIs, tools, and techniques and implement business solutions that require cutting-edge technology.

Technical Skills

Operating systems:	Linux, Windows
Programming Languages :	Java-SE, J2EE
JavaScript Frameworks/Libraries:	jQuery, JavaScript, React js
Web technologies:	HTML5, CSS3, JavaScript, AJAX, jQuery, JSON, Spring boot, Spring cloud, Spring Data JPA
Programming Frameworks:	Hibernate, Spring boot(2.4.0)
Build Technologies:	Git hub, GitLab, Bit bucket
IDE:	Eclipse, Web Storm ,VS-code
Methodology:	Agile
Database:	MySQL

Development Tools:	Webstorm, IntelliJ IDEA, Sublime, Eclipse, notepad++

Projects Details

CONFIDENTIAL	
<p>The Loan Approval/disapproval cycle is being managed and configured traditionally with all the inbound of manual processes. Considering this, our team introduced a Digital Platform where an Applicant can know his eligibility within a few clicks while applying for a "Two-Wheeler Loan" and within a 15 min time constraint. Our platform revamps it digitally with our Automated Web-Application platform to cover the end-to-end pipeline from storing the applicant's personal information to Verifying the customer information and simultaneously generating cibil report along with Field investigation. This Digitally revamped platform also visualized past/present data with graphical representation for a better lookout insight wise.</p>	
Technology:	Spring boot, JSP, JS
Tools:	IntelliJ IDEA, DBeaver, Postman
Database:	MySQL
Platform:	Web

CONFIDENTIAL	
<p>The Aim was to develop a web-application for the Organization in which all the work processes and methodology can be managed dynamically. To begin with, the routine tasks allocation, end-to-end resources deployed with assigned project status quo, and Team's progress periodically et.al. are being managed. Tracking and Monitoring the expenditure with the daily billings documents and other relevant descriptions are also mentioned. The Employee Task's calendar and meeting schedule are also some of the key features that we had developed.</p>	
Technology dependencies	Java, Spring Boot, React
Tools	Eclipse, Webstorm, VS code

Database	MySQL
Platform	Web App

CONFIDENTIAL	
<p>Considering all the Academic user-defined paradoxical points and on the need to-be done basis, our team developed a digitally scalable cutting-edge Platform that brings a Seamless Skills and Certification Program on a Single Platform. Our Automated Digital Platform includes a Skill Assessment Portal based on the skills the user selected. The Next Part involves the End-to-end completion of assessment before the user can take skill certification. You are allowed to retake the assessment. All the assessments were derived based on Ranking Algorithms and Point-Grade system provided from Client's end. Individual Progress of the user is displayed on our Dynamic Dashboard with time-based data visualization.</p>	
Technology portion	Java, Spring Boot, React
Tools	Eclipse, VS code
Database	MySQL
Platform	Web App

CONFIDENTIAL	
<p>We Introduced a Business Intelligence Tool Engine where millions of data endpoints that included super critical flooded data gets pre-processed and gets monitored for a secured pipeline configuration. Our Platform also integrated pre-defined graphical representation templates that can be dynamically used by user itself. This cutting-edge solution revamped the whole traditional BI-Engine and additional created Reports in the desired format.</p>	
Technology portion	Spring boot, J2EE, JS
Tools	Eclipse, VS code
Database	MySQL

Platform	Web App
