PROPUESTA 1

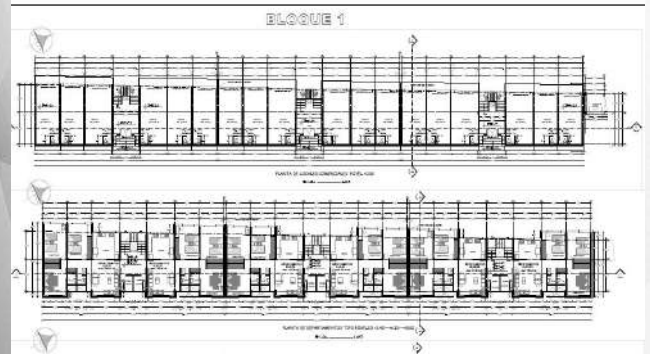

2

PROJECT OASIS DE LA HACIENDA

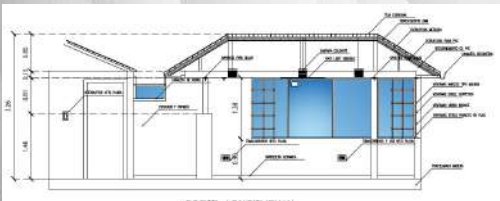

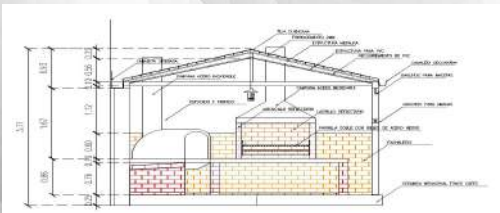

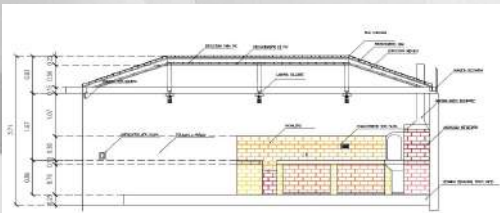

Realization of interior architectural design and construction of a 750 m2 housing tower in a reinforced concrete structure, masonry, electrical and sanitary installations, finishes.

3 PROJECT ALBA

Realization of interior and exterior architectural design, construction of amenities in metallic structure, masonry, electrical installations and finishes.

4

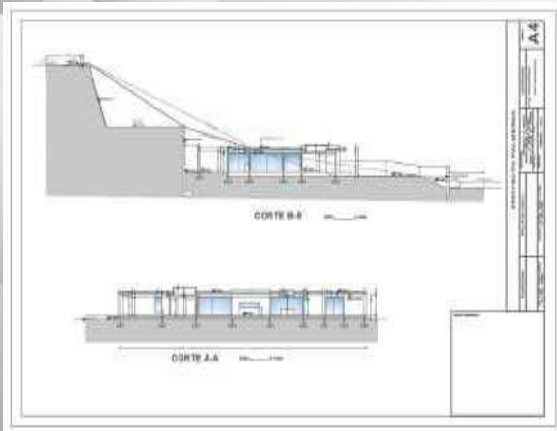

PROJECT
OF
PLANIFICATION

1.4

PROYECTO
PALMERAS

Realización de diseño arquitectónico de vivienda.

Planimetria completa para aprobación municipal, junto con video

4

PROJECT OF PLANIFICATION

2.4

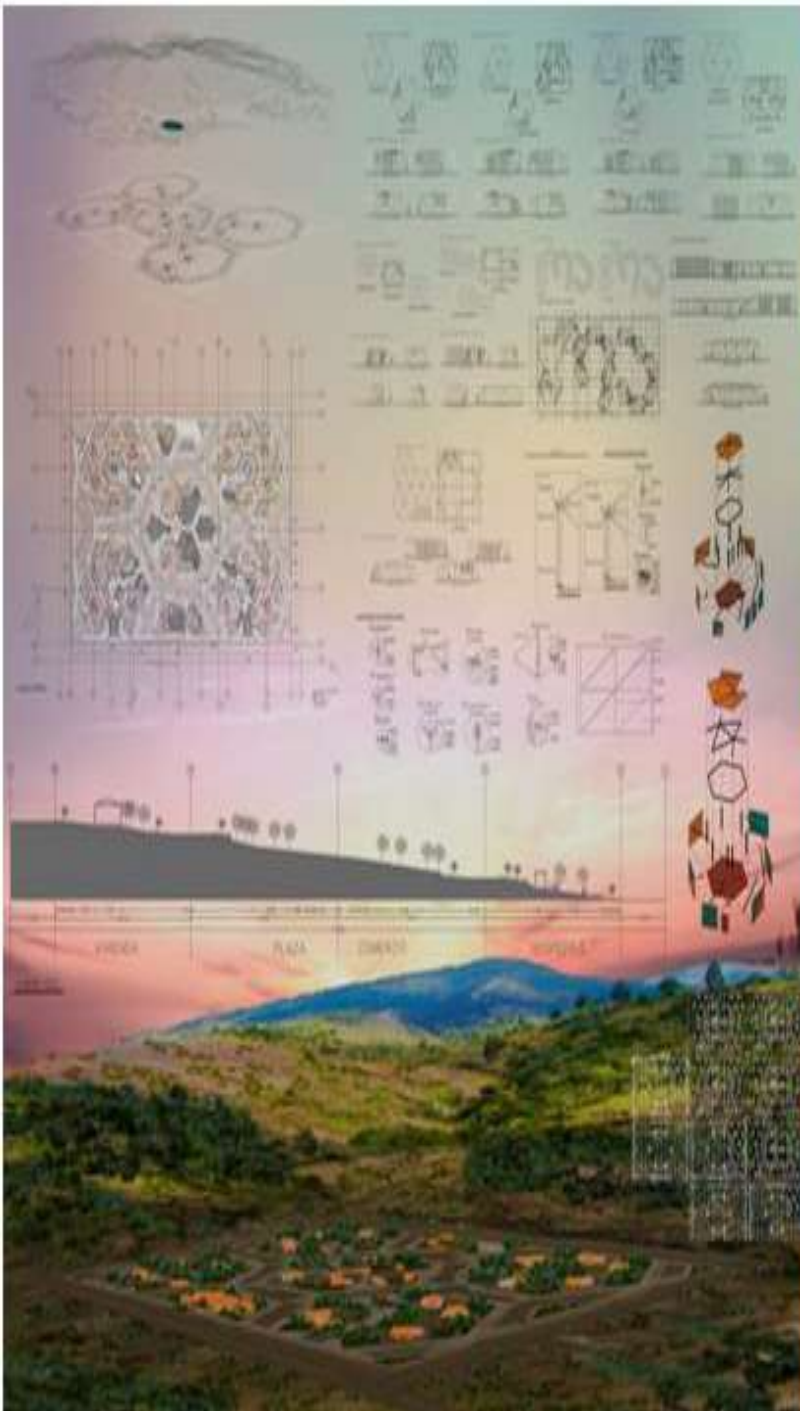

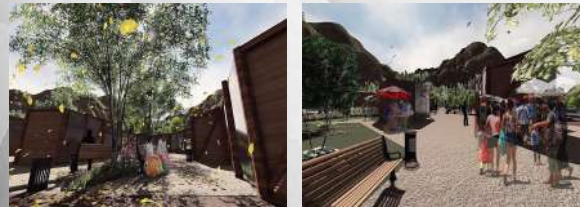

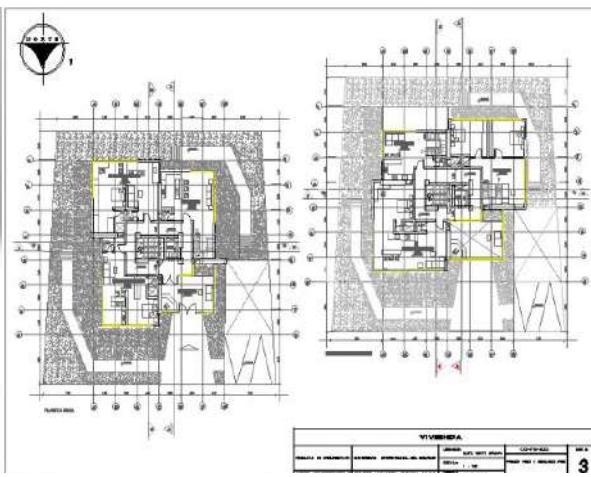

ADAPTABLE MODULAR HOUSING SYSTEM

Realization of architectural and urban design of houses that can be adapted with a module, which can be multiplied or divided so that the house changes its use.

The module is triangular, its structure is prefabricated and easy to understand for its assembly.

The triangular module is found from the micro to the macro.

4

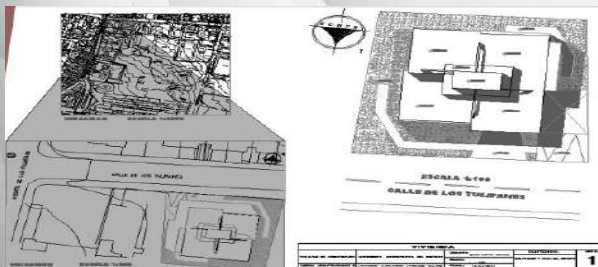

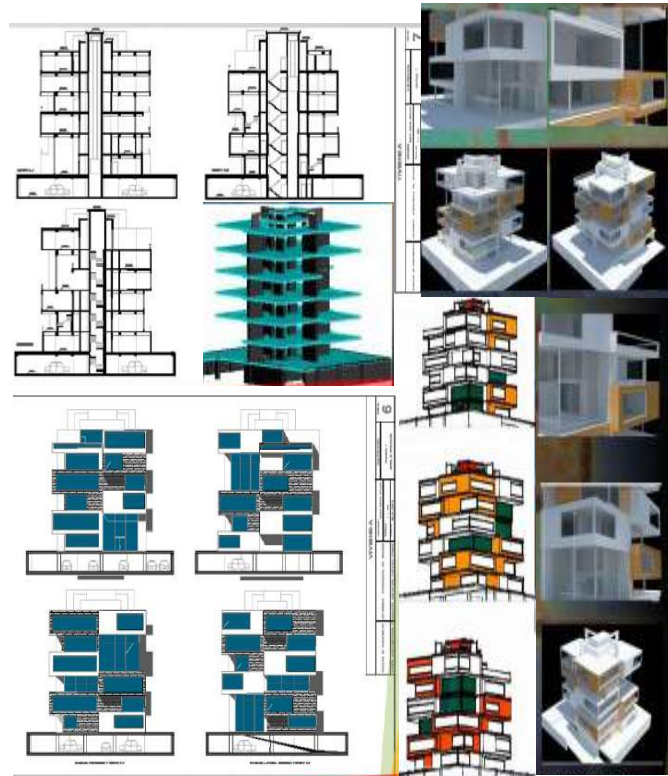

PROJECT OF PLANIFICATION

3.4

HOUSING TOWER MAT-BUILDING

Realization of architectural design of high-rise housing, union of tower and mat-building.

The uses are interwoven with each other, like a tessera with a double space, in the case of falling into an apartment it is a duplex that is interspersed between floors that rotates, this can be seen in the plan, sections and facades,

4

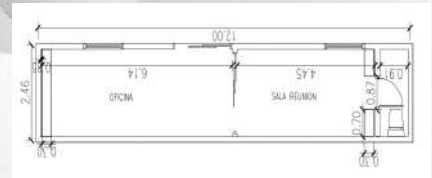

PROJECT OF PLANIFICATION

4.4

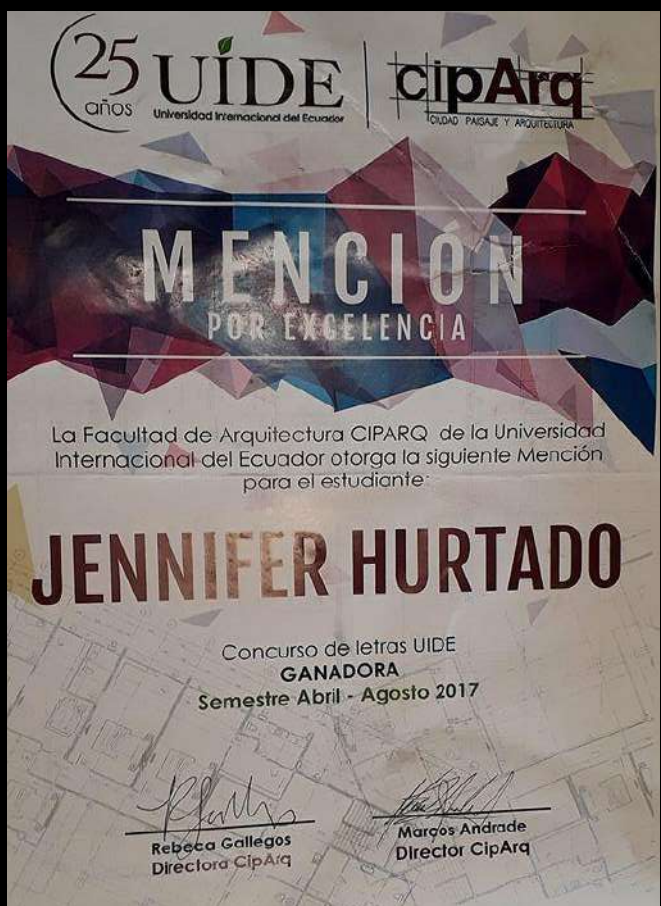

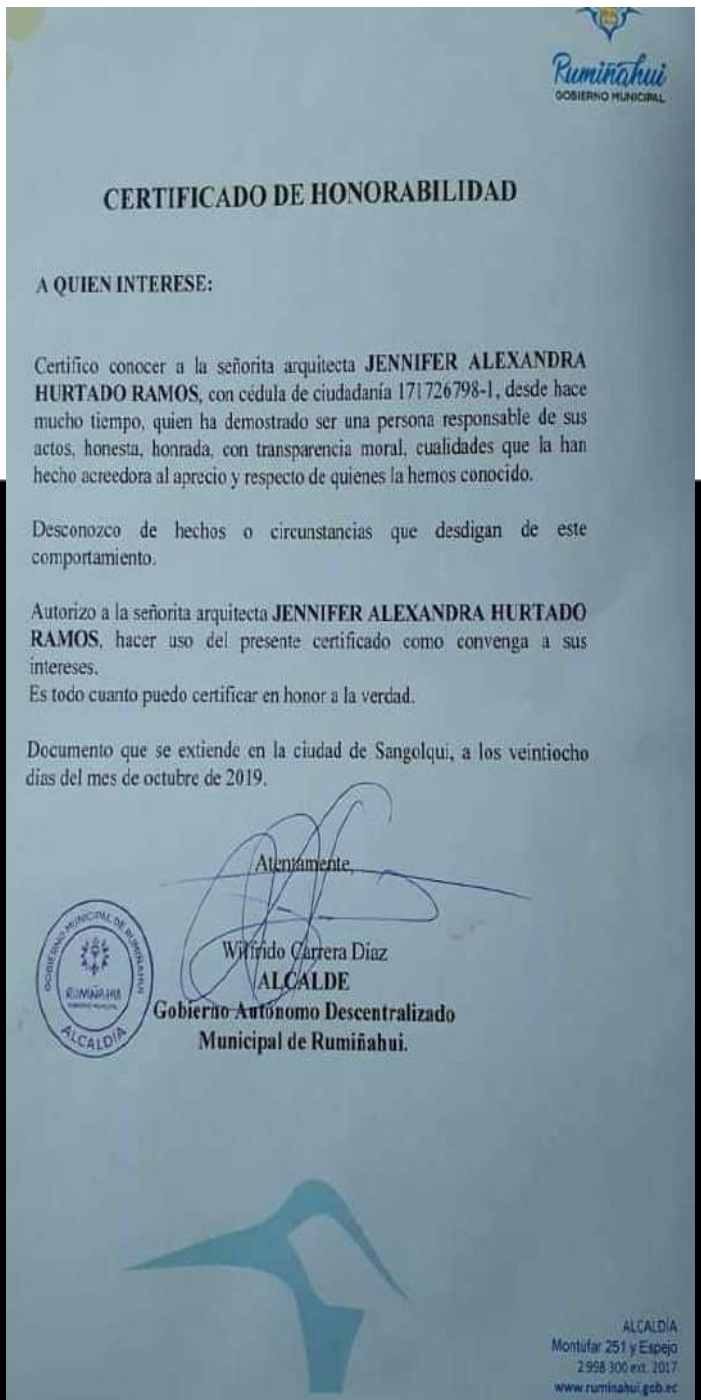

REMODELING OF OFFICES

Realization of interior architectural design with serial plans and adaptable modules.
