Summary

:

I am in charge of our Intelligent Automation (IA) teams, and I would love to discuss how our people (or bots) can help you to improve your business. Our software bots are capable of performing repetitive mundane tasks in less time than humanly possible.

:

I work with sales, marketing and recruitment companies to improve their business processes. Our customers are small and medium sized companies (10-100 FTE) who are looking for innovative ways to use Artificial Intelligence and Intelligent Automation to build a robotic workforce.

:

If you are looking for a way to automate Sales, Marketing or Recruitment processes, and you want to do this in a cost effective matter.

:

Robots and Artificial Intelligence are the latest tools IT service providers added to their toolbox. These tools are capable of doing things that where impossible 5 years ago, and will outperform humans within the next 5 years. This is general knowledge. But we take it one step further. Let bots do the work that is simply to boring for humans to do, and relieve your human resources from these boring and repetitive tasks.

Experience

Chief Technology Officer
Autom8
May 2022 - Present (7 months +)
Chief Technology Officer @ Autom8

Healthcare process automation (RPA)

Jan 2021 - Nov 2022 (1 year 11 months)
Managers in the healthcare industry have been struggling to reduce administrative tasks for their team members. At botstore I help healthcare companies with analyzing their processes, detecting the opportunities for automation and develop the software to automate those tasks.

Every step starting at appointment scheduling, trough updating dossiers, and filing the declarations can be automated. So that your team can spend more time besides the patient, instead of behind the desktop.

Robotic Process Automation and Integration Expert

Dec 2020 - Nov 2022 (2 years)
Botstore builds accessible and ready-to-use robots (digital assistants / software programs) for all tasks on computers and smartphones. We do this for the industries noted above, and for service providers in general.

Rage Master

Rage Room FUN
Mar 2021 - Feb 2022 (1 year)
Rage Room FUN is the latest and greatest in post-pandemic entertainment.

Business Consultant

Fivespark
Jun 2020 - Dec 2020 (7 months)
Need IT to work? My futuristic vision and approach to current day ICT challenges prepares your company for the future. The greater goal for technological modernization is Business Innovation.

Founder

Jan 2020 - Dec 2020 (1 year)
All over the world people are moving toward urban centers looking for jobs and opportunities. Most people are struggling to find an affordable place and settle for a small one-bed, one-bath apartment. And while most people live alone, the number of persons that express feelings of loneliness and isolation is growing. It is in these situations that sharing a home provides us with a logical and affordable way of living.
Alin Proptech lays the foundation to organize Coliving on a small scale with the right persons. Because it are our common interests and purposes that create new friendships.

With Alin Proptech our first mission is to make living affordable again.

We use Coliving to offer people a Cheaper, and a Richer life.

Information Security Officer & System Administrator
Wunderman Thompson Netherlands

Mar 2019 - Oct 2019 (8 months)

At Emark I was tasked with drafting and implementing the IT security policy.

We worked in a modern IT environment without a lot of issues, for which I did the daily system-, network- and application management.

Security Professional
Sogeti

Jan 2018 - Jan 2019 (1 year 1 month)

At Sogeti I was the Security Professional. In this role, I am helping customers with a broad range of security-related tasks like:

Performing risk analyzes, complying with legislation and regulations, Identity & Access Management and creating and implementing an information security policy.

I worked for multiple customers in various branches.

ICT Manager

Aug 2014 - Dec 2017 (3 years 5 months)

At King Cuisine I was responsible for all aspects of IT and automation.

I maintained the windows and Linux servers running on physical and virtual machines inside our own datacenter.

I was responsible for the ERP system and I developed the frontend and backend of a new mERP system in PHP.

IT en Telecom engineer
Into Telecom

Aug 2012 - Jun 2014 (1 year 11 months)

Systeembeheer in meerdere klant omgevingen waarbij gebruik word gemaakt van verschillende technologieen. Exelente service, en pas tevreden als de klant goed geholpen is. en natuurlijk scherp geprijsd

System Administrator / Owner
Dedicated Networks

Feb 2007 - Sep 2012 (5 years 8 months)

Bij Dedicated Networks weten we dat voorkomen beter is dan genezen, dat is de reden dat wij ons voornamelijk richten op het voorkomen van storingen en het beperken van de impact er van, in plaats van te wachten tot de gebruiker een storing bij ons meld.

PRO-active system administrator
Dedicated Networks

Feb 2007 - Jan 2011 (4 years)

System Administrator

Apr 2009 - Nov 2010 (1 year 8 months)

first and second level IT support and internal systems with two interns I supervised

Education
