## WORK EXPERIENCE

### Upwork

Software Project Management & Flutter Developer

Our goal :

is to effectively enhance creative and innovative ideas by transforming them into new mobile applications or websites and contributing to the development of new features, in order to produce a successful and competitive project.

I have the necessary technical and management experience to analyze, manage and build startup technological projects. I will work on the project using strategic organizational steps to give you a complete project that matches what is in your mind, starting from studying the work model, analyzing the idea and targeting customers and market, designing the project identity or logo and designing a complete UI/UX for the application, building the application as a Flutter App, building the website, building the database, personal experience, notifications, quality basics, final testing, release, and special technical support for the project for 6 months.

What we offer for the project :

- Analysis of the idea and market study, competitor analysis, and creation of a Business Model Canvas
- Development of a comprehensive feasibility study for the project Design of a logo or identity for the project
- Design of a complete UI/UX for the application
- Building the application as a Flutter App that works on both Android and iPhone
- Building the complete website
- Building the database and project management panel
- Publishing the project to your personal accounts on the App Store and Play Store and uploading the website to your personal server
- Development of a complete Business Plan for the project
- Full technical support for the project for 6 months

Committed to giving you a perfect working experience, so our plans for work include constant monitoring of the work carried out, incorporating all of your special suggestions, and developing them in the best designed ways to ensure high performance and the best outcome for the project

ElSeraj - السيراج : Quran offline application

The ElSeraj application, is a Quran application that allows users to read the Quran offline, with various features such as font size and font type customization, direction of Qibla, prayer times, Adhan and Duas, and religious articles. The application is built using the Flutter platform and will soon be available on both the App Store and Play Store. The project is also shared on Behance, you can find the link in the description.

The application's key features include:

- Full Quran offline
- Qibla direction and Dua's, Prayer time and Adhan
- Religious articles
- Notifications

The project was completed in several steps:

- Project analysis
- UI/UX design for the application
- Development and implementation of the application using the Flutter platform
- Database creation and application control panel
- Completing the application in its entirety.

- Overall, this project aims to provide an easy-to-use and customizable Quran application for users to enhance their religious experience, without the need for internet connection, and also providing an easy way to follow the prayers times, and religious articles.

Melamsee e-Commerce App: Food Delivery

Melamsee is an innovative food delivery application that allows users to order meals based on their meal type such as breakfast, lunch, and dinner. The app functions as an e-commerce platform and offers in-app payment options, notifications, and deals. The simple and creative design of the app aims to provide users with a seamless and enjoyable experience.

-- The benefits of Melamsee are numerous, including:

- Convenience: The app allows users to order their meals from the comfort of their own home, with the option of direct delivery to their doorstep.
- Variety: Melamsee offers a wide range of meal options for breakfast, lunch, and dinner, providing users with a diverse choice of dishes to suit their taste.
- Time-saving: With Melamsee, users can place their orders in a few simple steps, saving them time and effort.
- Personalization: The app provides users with the ability to customize their orders according to their preferences and dietary restrictions.
- In-app payment and notifications: The app offers a secure and convenient way to pay for orders directly within the app, and also sends notifications to keep users updated on their order status.
- Deals and offers: Melamsee regularly offers deals and discounts to its users, making it an affordable and cost-effective option for food delivery.

In summary, Melamsee is a user-friendly and efficient food delivery app that offers a wide range of meal options, in-app payment, personalized ordering, and deals. It aims to provide users with a seamless and enjoyable ordering experience.
