LANGUAGES	LEVEL	Note
English	Ok	Got a Vietnamese certificate

PROJECT LIST

PROJECTS INVOLVED		
No	Projects	Description
1	Project Name	Saigon Plant Protection Joint Stock Company
	Project Position	IT staff
	Tasks	Manage the server system and the network - Support for the 100 users: Install the computer, fix the error software, backup the personal data, backup the email, and install the softwares required - Create tables in SQL as required by software, update data, query
	Group size	100 people
2	Project Name	Ocean Bank
	Project Position	Tech Leader
	Tasks	- DataBase: Oracle, SQL, MySQL, PostgreSQL, MongoDB - Web Backend: C#, Nodejs - Frontend: Javascript, html, css
	Group size	2500 people
3	Project Name	ParaLine(outsorce MB bank)
	Project Position	Tech Leader
	Tasks	Daily work: - Data Engineer: Use Pentaho, SSAS, ODI tools to create, edit and write streams. - Data Analyst: Writing reports using Sql Developer and PL/SQL tools, in Packages, Functions, Procedures - Database: Oracle, SQL Server
	Group size	
	Group size	

PROJECTS INVOLVED		
No	Projects	Description
4	Project Name	Gem Your Trusted Partner
	Project Position	CTO
	Tasks	<p>Head of department:</p> <ul style="list-style-type: none"> - Operate Data lake system for Viettel. Specifically for the markets of VTZ, VTB, VTB countries. - Create and edit smart reports using Tableau BI for Viettel Group. - Data Engineer: Operate Big Data on technology platforms such as Ambari Server (Nifi, Hive...), Pentaho, Dbeaver, Tableau Prep, Tableau Desktop. - Data Analyst: Writing reports using Sql Developer tools in Packages, Functions, Procedures. - Database: Oracle
	Group size	
5	Project Name	FSOFT
	Project Position	CTO
	Tasks	<p>Head of department:</p> <p>Doing projects for the Japanese market</p> <ul style="list-style-type: none"> - Participating projects for Fast Retailing for 2 brands Uniqlo, GUI - The Uniqlo project converts data from local (Postgres) to the cloud (GCP) to ensure that the query, functions, procedures, packages when going to GCP must be exactly the same as in Postgres. Use Tableau Desktop for smart reporting. - The GU project converts data from local (Postgres) to the cloud (GCP) to ensure that the query, functions, procedures, packages when going to GCP must be exactly the same as in

PROJECTS INVOLVED		
No	Projects	Description
		Postgres. Expanding the Elasticsearch system to new markets such as Vietnam, Thailand, Australia... - Data Engineer: GCP, Postgres, Tableau Desktop. - Data Analyst: Writing reports using Sql Developer tools in Packages, Functions, Procedures. - Backend: Django Database: Postgres, GCP

In addition, I work on other projects as an expert

Project 1:

- Digital Transformation Project for Vietnam National Power Transmission Corporation
- Build Data warehouse, Data Mart, Tableau Server systems, create reports with Tableau Desktop
- Data Engineer: Use Pentaho tools to create, edit and write streams. Build Tableau Server, use Tableau Prep to create new, edit streams. Build with Tableau Desktop Dashboards.
- Data Analyst: Writing reports using Sql Developer tools in Packages, Functions, Procedures
- Database: SQL Server

Project 2:

- Digital Transformation Project for Vincom Retail
- Build a Data warehouse, Data Mart system, create reports with Power BI
- Data Engineer: Use SSIS tools to create, edit and write streams. Build Power BI to create new, edit streams. Build with Power BI Dashboards.
- Data Analyst: Writing reports using Sql Developer tools in Packages, Functions, Procedures
- Database: Azure, SQL Server

PERSONAL INTERESTS

Football, traveling, drinking beer, watching movies ...
