PROFILE

I,m Roberto and i've been working as an Architect consultant for the last 7 years. I am a qualified and experienced CAD Technician. My strenght points are the creation of 2D/3D drawings with a keen eye for details, a deep knowledge in the standardization process for drawings and methods (such as Layers organization and folder structure), a great aptitude to work in team and good problem solving skills. In the last 5 years i've been collaborating with an Irish company producing high quality drawings including details at any scale. I've developed an extremely high aptitude in matching deadlines.
