Duration	:	Aug 2014 – Feb 2016
Organisation	:	IBM INDIA PVT LTD., Chennai
Designation	:	Senior System Engineer
Duration	:	June 2010 – June 2014

Achievements	:	Got Raising Star award from CBA for finishing the Adviser Reskin project in short time span
Organisation	:	Ivesia Solutions Pvt Ltd., Chennai http://www.ivesia.com/
Designation	:	Senior Programmer Analyst
Duration	:	Aug 2008 – Feb 2010
Achievements	:	Won the Best performer award for analyzing and implementing the requirements in timely manner.
Organisation	:	Profiniti Systems, Chennai http://www.profiniti.com/
Designation	:	Software Developer
Duration	:	Mar 2006 – Aug 2008
Achievements	:	Won an Excellence Certificate from the customer for executing the project in timely manner and for the support rendered.

Software Developing Experience

Project #1

Project Title	:	RealTime Tracking Location in Corey Health
Organization	:	Coremobile Inc
Domain	:	Health Care
Platform	:	ASP.NET MVC Core 5.0, C#, Entity Framework, Web API, WPF, SQLSERVER2016
Role	:	IT Consultant (Developer)
Team size	:	40
Duration	:	Apr 2020 to Till Date

Project Description:

- Core mobile provide the option to synchronize and track the patients/Staff/Asset using real-time-tracking location in Corey health. Receptors acts as readers to track the beacons, Bluetooth device given for patient / Staff / Asset. The readers track the movement of Patient / Staff / Asset. The tracked movements shown in the Indoor Map of the organization.
- Core Mobile's digital health solutions enhance surgical workflow efficiency, reducing delays, no-shows, and readmissions.
- Core Mobile's digital health solutions enhance to prove to automate the check in process.
- Integration to **Mirth** to **Vista**, **Mirth** to **Cerner**, **Mirth** to **Meditech** and **Mirth** to **Epic** support given to the integration team to get the details of patients, providers, schedule and for consult creation.

Responsibility:

- Clarification in the requirement with the onsite team to split the task and assign to the team members. EOD check the status of the team members task in Azure and send the report to the project Manager
- Working on the new feature implementation stories raised in the azure devops tool.
- Working on the change request raised in azure devops tool
- Supporting the product issues raised by the customers at priority level.
- Supporting the product release and meeting in Deep Dive analysis and planning calls for future sprints.
- For each stories in azure devops, developer demo and full stories demo delivered to product owner.
- Peer code review done on sprint basis.

- Maintaining Agile Scrum meetings and updating daily status in azure devops.

Project #2

Project Title	:	Beamstudio
Organization	:	XUVI India Pvt Ltd
Domain	:	Gaming & Retail
Platform	:	ASP.NET MVC Core 2.0, C#,Linq,Jquery SQLSERVER2015, Mongo DB, Entity Framework, Web API
Role	:	Full Stack Developer - Development
Team size	:	10
Duration	:	Jan 2019 to Sep 2019

Project Description:

- Beamstudio is Immersive Data Analytics and CRM Automation Platform to engage consumers, improve operational efficiency, optimize spend and increase revenues in (Casino) Gaming domain.
- CRM automation software platform to build brand loyalty, enhance customer experience and optimize costs.
- Segmentation, Offer Management, Journey Management, Direct Mail, A/B Experiments, Dynamic Pricing, Campaign Builder, Event Management, Performance Stats, Instrumentation, Social Connectors, Customer single view, Inventory Control, Demand Forecast, Fraud Protection are features available beamstudio
- Key Benefits of beamstudio is personalized marketing, Operational efficiency, Revenue & cost optimization.

Responsibility:

- Working on the new feature implementation stories raised in the JIRA tool.
- Working on the change request raised in JIRA tool
- Supporting the product issues raised by the customers at priority level.
- Supporting the product release and meeting in Deep Dive analysis and planning calls for future sprints.
- For each stories in JIRA, developer demo and full stories demo will be delivered to product owner.
- Group peer code review will be done on sprint basis.
- Creating test cases for the CR raised and manual testing for the CR worked.
- Maintaining Agile Scrum meetings and updating DSR via mail.

Project #3

Project Title	:	ADL - Activities of Daily Living
Organization	:	CES Ltd
Client	:	Kinnser (Mediware USA)
Domain	:	Healthcare
Platform	:	ASP.net, MVC3.0, C#, Linq, Jquery SQLSERVER2012, Entity Framework, Web API
Role	:	Full Stack Developer - Development
Team size	:	10
Duration	:	Apr 2017 to Dec 2019

Project Description:

- ADL is for activities of daily living which is main source for client and caregivers in health care domain.
- ADL having multiple modules like Client, staff (i.e) caregivers, clinical, Billing, Payroll, reports and admin.

- Email and SMS features enabled to alert caregivers for their schedules.
- Google analytics implemented to track the metrics for ADL site with module wise. This helps the product owner to know more about the metrics usage of ADL.

Responsibility:

- Working on the change request raised by the client in JIRA tool
- Supporting the product issues raised by the client at priority level.
- Supporting the product release and meeting in Deep Dive analysis and planning calls for future sprints.
- For each stories in JIRA, developer demo and full stories demo will be delivered to product owner.
- Group peer code review will be done on sprint basis.
- Creating test cases for the CR raised and manual testing for the CR worked.
- Maintaining Agile Scrum meetings and updating DSR via mail to the client.

Project #4

Project Title	:	Recruitlive Web Application (Product)
Organization	:	Independent payroll services pty ltd
Clients	:	Interpro pty ltd, Sydney
Domain	:	Recruitment and Finance
Platform	:	ASP.net MVC 3.0, C#, Linq, JQuery SQL SERVER 2008
Role	:	Senior Software Analyst
Team size	:	10
Duration	:	Sep 2016 to March 2017

Project Description:

- Recruit live is a fully fledged end to end web based portal for the recruitment industry. With its empowering features and performance, it undoubtedly increases the productivity of the recruitment agency. Few of the salient features include
- It enables real-time viewing, searching, tracking, and processing of all aspects throughout the entire recruitment process and very effectively reduces the time span of the recruitment cycle
- Requires very less training as it understand the needs of the business so well
- Developed with Microsoft’s cutting edge technology MVC architecture, it gives a boost to the working efficiency of the recruiters.
- Impressive and user friendly user Interface
- Maintains efficient resume bank of candidates.
- Effective Search Engine with Boolean and keyword search
- In built intelligence at all the key places
- Integrated Notes with every action of candidate, contact, client, job
- Inbuilt role based security model
- Events and actions and interviews are effectively represented in the diary module with various views
- Interactive and efficient communication to users with alert and auto emails and reminders for respective actions at each stage
- Customizable look and feel as per the user’s locale and theme selection.

Responsibility:

- Working on the change request raised by the client
- Supporting the product issues raised by the client at priority level.
- Creating test cases for the CR raised and manual testing for the CR worked.
- Maintaining Scrum meetings and updating DSR via mail to the client.

Project #5

Project Title	:	Vehicle Finance Risk App (Web Interface and Mobile App)
----------------------	---	--

Organization	:	Equitas MicroFinance Ltd
Domain	:	Finance
Platform	:	ASP.net 4.0, C#, HTML 5, CSS3, SQL SERVER 2008
Role	:	Manager IT - Development
Team size	:	10
Duration	:	Mar 2016 to Sep 2016

Project Description:

- Consumer acquisition and pricing analytics.
- Retail Dealers line of credit – Underwriting and Credit Reviews.
- Dealer portfolio administration.
- Account management analytics.
- Collections and operations analytics.
- MIS and reporting.

Responsibility:

- Gathering requirements from the business team.
- Creating user requirement document and get confirmation from business.
- Create Low level design document for the requirements.
- Technical Guidance provided to the team members.
- Code review and build review to be done.
- Work done and delivered in a timely manner

Project #6

Project Title	:	Prometric’s Internet-Based Testing (IBT)
Organization	:	Calsoft Labs India Pvt Ltd.,
Client	:	Prometric, USA
Domain	:	Education
Platform	:	ASP.net 4.0 (MVP Pattern), SQL SERVER 2008
Role	:	Technical Lead - Development
Team size	:	10
Duration	:	Aug 2014 to Feb 2016

Project Description:

- The purpose of Prometric’s Internet-Based Testing (IBT) is to allow tests to be delivered over the internet with a minimum of technology on the user’s side.
- The IBT system allows for testing and Prometric Admin within an HTML browser-based environment, making tests more accessible.
- IBT users can be mapped under the following 11 groups, Unregistered User, Registered User – General, Candidates, Author, X-System Proctor / Sponsor Proctor, Statistician, X-Accountant. Sponsor Admin, Client Admin, X-Prometric Admin, Support Admin / Internal Admin.
- Every user, regardless of access level, must sign in to the system. These user groups are currently not used in the IBT application.
- All production user accounts are listed as “Candidate”, so the user group mapping listed in this section should not be used to drive any functionality as permission groups control what a user may or may not access.
- IBT has provision to create new groups and control access to different functionality of the IBT application through “Edit Group Permissions” feature.

Responsibility:

- Analyzing the Tasks. Coding, Unit testing, bug fixing and Code Review.
- Coordinating with Onsite Project Manager.
- Releasing the Builds and Source Code & Documents maintenance.
- Technical Guidance provided to the team members.

- Working with MVP pattern and WCF service.
- Work done and delivered in a timely manner.

Project #7

Project Title	:	PIA (Product Information Assistance)
Organization	:	IBM India Pvt Ltd.,
Client	:	IKEA, Sweden
Domain	:	Retail
Platform	:	ASP.net 4.0 (MVP Pattern), Oracle 11g
Role	:	Senior System Engineer
Team size	:	100
Duration	:	Mar 2013 to Jul 2014

Project Description:

- The Product Information Assistance is referred as PIA is the source for product information to customers, suppliers and IKEA co-workers.
- PIA is the source of the products that are created and sold at IKEA.
- PIA manages the product life cycle and the application is for planning and steering product development projects.
- The information is created in English and Swedish and used in different media, e.g. in store communication, in the IKEA catalogue and on the IKEA web sites.
- PIA is a creating process application and the activity done on this is Create Idea & Design, Develop the offer, First Buy, Sales start, Wash Council meeting, Product Council and Contract Review.

Responsibility:

- Analyzing the Tasks. Coding, Unit testing, bug fixing and Code Review.
- Coordinating with Onsite Project Manager.
- Releasing the Builds and Source Code & Documents maintenance.
- Creating Oracle packages queries.
- Working with MVP pattern and WCF service.
- Work done and delivered in a timely manner.

Project #8

Project Title	:	CCP (Common Configurator Platform)
Organization	:	IBM India Pvt Ltd.,
Client	:	ABB, Germany
Domain	:	Retail
Platform	:	ASP.NET MVC 3.5, C#, WCF, Oracle 11g
Role	:	Senior System Engineer
Team size	:	12
Duration	:	Oct 2012 to Feb 2013

Project Description:

- The Common Configurator Platform (CCP) is the global tendering tool for the Power Product Division.
- CCP serves as the communication tool between the Front End Sales (FES), Global Marketing Units (GMU), and the Focused Feeder Factories (FFF).
- CCP will also support the internal tendering process from the Power Products Division to the ABB System units.
- CCP is an enabler for both the sales force and the New Business Model project. It serves as the link between the Front End Sales (FES), Global Marketing Units (GMU), and the Local Business Units (LBU).

Responsibility:

- Analyzing the Tasks. Coding, Unit testing, bug fixing and Code Review.
- Coordinating with Onsite Project Manager.
- Releasing the Builds and Source Code & Documents maintenance.
- Creating Oracle packages queries.
- Work done and delivered in a timely manner.

Project #9

Project Title	:	IRIS (Integrated Risk Information System)
Organization	:	IBM India Pvt Ltd.,
Client	:	TD Bank, Canada
Domain	:	Banking
Platform	:	SQL Server 2005
Role	:	Senior System Engineer
Team size	:	7
Duration	:	Feb 2012 to Sep 2012

Project Description:

- IRIS (Integrated Risk Information System) will work as the front-end reporting solution for Credit Risk Data Mart (CRDM).
- IRIS will be focusing on consolidated credit exposure reporting across multiple loan, trading and treasury products.
- The objective is to design and implement a system that can capture pertinent credit risk exposure information and to comply with TD Bank Credit Risk exposure guidelines.
- IRIS will allow the user to monitor and manage credit exposures and comply with guidelines set internally and generate aggregated daily credit exposure reports.
- The application leverage the data currently captured in CRDM, which eliminates the need to extract data from the different sources to compile credit exposure reports. Have a larger range of market data feeds from various sources such as Moody's, Standard & Poor's, along with the internal risk rating measurements calculated internally.

Responsibility:

- Investigating and creating system documentation on each work flow, from scratch by traversing through the stored procedures, analyzing and understanding the flow.
- Worked in DTS jobs, stored procedures, functions, etc in sql server 2005.
- Supported testing team for to check functionality testing for releases.
- Work done and delivered in a timely manner.

Project #10

Project Title	:	Adviser Reskin
Organization	:	IBM India Pvt Ltd.,
Client	:	CBA (Common wealth Bank, Australia)
Domain	:	Insurance
Platform	:	ASP.Net 3.0, SQL Server 2005
Role	:	Senior System Engineer
Team size	:	5
Duration	:	Sep 2011 to Jan 2012

Project Description:

- The adviser Site application is a content management application and maintains other CommInsure Applications like EappLifeRisk, CALQ and Adviser Tracking.

- This site provides information about CommInsure products, News, Did you know articles and sales materials to advisers. This information is provided through content pages that are mostly static content, with a section that allows users to search for brochures and order online.
- Advisers view their commission statements and Life400 reports through Adviser Site. CommInsure Adviser site is to host the forms on the CommInsure site but have them submit to pages that sit in the Colonial domain i.e on the colonial Adviser Server.
- The scope of the Adviser Reskin project is to change the adviser site pages to the new mockups finalized by the client.

Responsibility:

- Redesign the pages as per the clients request with in the short period of time.
- Coordinating with the team in other locations to deliver the product at schedule time.
- Handled client discussion to walk through with the client requirements.
- Work Products are delivered within the time frames. Got raising star award from CBA client for this project work done and delivered in short span time

Project #11

Project Title	:	DCC PIU (Data center consolidation) (Panda\iInvest\UPCA)
Organization	:	IBM India Pvt Ltd.,
Client	:	CBA (Common wealth Bank, Australia)
Domain	:	Insurance
Platform	:	ASP.Net 2.0, SQL Server 2008
Role	:	Senior System Engineer
Team size	:	10
Duration	:	Sep 2010 to April 2011

Project Description:

- The primary goal of the DCC project is to vacate all equipment from L19 52Martin place prior to the end lease date.
- The main objective of the DCC project is to upgrade the DTS of UPCA and PANDA to SQL 2008, Crystal report upgrade from 9.0 to higher version, appcentral exe upgrade from 2.0 to 3.0 and application (UPCA\iInvest\Panda) upgrade from 1.0 to 1.1 framework.
- Worked in the timely manner and presented documentation for all the work done.

Responsibility:

- To change the DTS from sql 2000 to sql 2008 with legacy structure.
- Upgrade of appcentral exe from 2.0 to 3.0 version. Upgrading the UPCA, PANDA and iInvest from 1.0 to 1.1 frame work.
- Worked on POC for crystal report upgrade from 9.0 to higher version.
- Documentation and presentation had done for the DCC concept.

Project #12

Project Title	:	DPSS Web
Organization	:	IBM India Pvt Ltd.,
Client	:	AT & T, US
Domain	:	Telecommunication
Platform	:	ASP.Net 1.1, SQL Server 2005
Role	:	Senior System Engineer
Team size	:	5

Duration : Jun 2010 to Aug 2010

Project Description:

- DPSS Web is a web-based application initiated as the networking division of Anixter until it was sold to Ameritech in 1999.
- The Application supports the CPE Data and Voice business.
- CPE includes the module Data warehouse for IVR module, IT project tracking module (pwh), Contract management, Online voice storage for DPSS, Quote module and interface to B2B Cisco Vendor via middleware.

Responsibility:

- Analyzing the Tasks. Coding, Unit testing, bug fixing and Code Review.
- Coordinating with US Project Manager.
- Releasing the Builds and Source Code & Documents maintenance
- Writing SQL queries, DTS jobs, Stored Procedures, Functions, Views and DDL scripts

Project #13

Product Title : **Smart view E-Learning Management System**
Organization : Ivesia Solutions, Chennai
Client : Ivesia Solutions Pvt. Ltd, Chennai
<http://www.ivesia.com/>
Domain : Learning and Development
Platform : ASP.net 1.1, SQL Server 2000
Role : Senior Programmer Analyst
Team size : 6
Duration : Aug 2008 – Till Date

Project Description:

- Smart view is an easy to use web based Learning Management System, which allows clients to better educate prospects, customers, re-sellers, and internal employees with their custom built content, or content supplied from third party sources.
- The latest version of Smart view is SCORM compliant, the de facto standard for e learning content.
- The developing version of Smart view is E-Commerce Compatibility.
- Smart view allows its users to:
 - Rapidly develop content
 - Deploy interactive media to the appropriate audience(s)
 - Motivate audience
 - Understand trends in your workforce, partners, and prospects
 - Track, Test, and Certify performance
 - Run reports on training status on a just in time basis.Scheduled Status Reports, Automated Mails to the Participants of Smart view

Responsibility:

- Analyzing the Tasks
- Coding, Unit testing, bug fixing and Code Review.
- Preparation of Low-level design document (LLD).
- Coordinating with US Project Manager.
- Prototyping
- Releasing the Builds and Source Code & Documents maintenance
- Writing SQL queries, Stored Procedures, Functions, Views and DDL scripts.
- Worked with the third party software's like captivate and Articulate to create lms package and used in our product.

Project #14

Project Title	:	Supply Management System (SMS)
Client	:	Healix Inc, U.S.A
Organization	:	Profiniti Systems, Chennai www.profiniti.com
Domain	:	Healthcare
Platform	:	Visual C#.net, SqlServer2005, .Net Framework 2.0
Role	:	Software Developer
Team size	:	7
Duration	:	Apr 2006 to Aug 2008

Project Description:

- The new system (SMS) should be able to accept requests for stock from sites process it and fulfill the request for the new system
 - The clinical staff at the site makes a request through SMS for an item (medical supplies / drugs /special) if the stock level falls below the pre-determined par level
 - This request will be processed by an expeditor (at the corporate warehouse). SMS would aid the expeditor in figuring out the best possible way of fulfilling the request. Priority is given for a stock transfer (Corporate Warehouse - Site, if not a Site - Site) otherwise the request is fulfilled by raising a PO with suitable Vendor (who gives the best price)
 - If it is through a PO, then the Vendor directly sends the goods to the site. If it is a Site - Site transfer, although the goods are transferred physically from one site directly to the requesting site, in SMS it will be recorded as a two step process. (Site - Corporate and Corporate - Site). In any case the clinical staff will acknowledge the receipt of goods through SMS
- The Supervisor (belonging to the Purchase Dept) has the maximum privilege among the users of SMS. Apart from handling requests for unapproved items and backing up for expeditors.

Responsibility:

- Involved in GUI designing of windows forms.
- Involved in design and coding of DLL.
- Involved in implementation of Remoting concepts.
- Involved in discussion with clients for clarifications.
- Involved in Writing Stored Procedures and functions.
- Involved in designing SSRS Reports.

Project #15

Project Title	:	Client Portal Application
Organization	:	Profiniti Systems, Chennai www.profiniti.com
Client	:	Healix Inc, U.S.A
Domain	:	Healthcare
Platform	:	ASP.net 2.0, SQL Server2000
Role	:	Software Developer
Team size	:	3
Duration	:	Feb 2007 to Mar 2007

Project Description:

- The Client Portal publishes financial statements to clients. (The client here would be the physician's office).
- Financial statements would just include cash and fund flow statements that are displayed from the "Financials" menu.
- Invoice summary and Details will be displayed from the "Invoice Payments" menu.
- There is an "Admin" menu to create user, assign sites to user and modify user.
- It supports Mozilla firefox, Netscape and IE.

Responsibility:

- Designing the application using ASP.net
- To maintain the client financial payment details
- Attending client discussions

Project #16

Project Title	:	Recruitment Application www.healix.net/employment/
Organization	:	Profiniti Systems, Chennai www.profiniti.com
Client	:	Healix Inc, U.S.A
Domain	:	Healthcare
Platform	:	ASP.net, SQL Server2000
Role	:	Software Developer
Team size	:	2
Duration	:	Mar 2006 to Apr 2006

Project Description:

- The Recruitment Application is developed to capture and retrieve the applicant information
- Electronically capture the details of the job applicants applying through the website
- Allow applicants to access previously submitted applications for review/update
- Allow partial or incomplete applications to be saved
- Send email containing the applicant details to the recruiters
- Upload Resume functionality
- Applicants are filtered through the related job code and education details
- It supports Mozilla firefox, Netscape and IE.

Responsibility:

- Designing the application using ASP.net
- To maintain backup of the applicant details
- Email the applicant resume to the appropriate job
- Attending client discussions

Educational Qualifications

- **Post Graduation**
 - Degree : Master of Science (M.Sc.)
 - Branch : Information Technology **(2004)**
 - University : University of Madras
 - Grade : First Class (75.0%)
- **Under Graduation**
 - Degree : Bachelor of Science (B.Sc.)

- Branch : Computer Science **(2001)**
- Institution : Quaid-E-Milleth College, Chennai
- University : University of Madras
- Grade : First Class (72.5%)

- **Higher Secondary school leaving Certificate (HSC)** from Board of Higher Secondary Examination, Tamil Nadu with **first class 79.1%**
- **Secondary school leaving Certificate (SSLC)** from Board of Higher Secondary Examination, Tamil Nadu with **first class 70.0%**
