WORK EXPERIENCE

Senior Developer

As a Senior Software Developer at Bridgecode, I have significantly contributed to various projects, including developing a POS system, CRM, Account Management tools, and a Booking Platform. I also led the creation of a real estate website and an e-commerce platform. My role involved leading the team, achieving a 100% user satisfaction rating with responsive tech support, and boosting team productivity by 60% with custom software solutions. My efforts in building and maintaining documentation sites led to increase in team efficiency.

PROJECTS :

Academic :

1. Smart and safe parking System (Final Year Project)

□ Description : In this System , we provide barcode to provide security to customer for their Personal Data and also we took customer data for once and store that in our database Aer that if the same customer come we just took their Vehicle Number. From Their vehicle Number we get all their details.

- Based on Java – Hibernate Framework , Html , CSS , JavaScript.
- Database used : Hield database

2. Sagar Handicrat :

□ Description : This is e-commerce Website . This project is for All handicraft items. This Project has Admin side and customer side. All data in website added dynamically.

- Based on Java – Hibernate Framework , Html , CSS , JavaScript , Ajax.
- Database used : Hield database

LIVE :

1. JIO SUPPLY

□ Environment : Asp.net

□ Project Description : Jio Supply is an e-commerce web application designed to ordering products online. The platform streamlines procurement processes by providing a user-friendly interface for managing product orders and registrations.

□ Role : Developed custom functionalities beyond the core capabilities of NopCommerce, including tailored notification systems, email integrations, and complex shipping calculations. Implemented features and enhancements according to specific client requirements, ensuring a seamless and optimized user experience.

2. FEEDELS

□ Environment : Asp.net

□ Project Description : Feedles is a comprehensive hotel review and booking platform designed to offer users a seamless experience in reviewing and booking accommodations. The system incorporates a range of functionalities typically found in review and booking websites, providing a robust solution for managing hotel reviews and reservations.

□ Role : Developed and implemented various features and functionalities to enhance user experience and streamline the review and booking processes. Ensured the platform's scalability and performance through effective use of ASP.NET MVC frameworks.

PROJECTS

LIVE :

3. ACCOUNT MANAGEMENT SYSTEM

□ Environment : ASP.NET

□ Project Description: Account Management System

The Account Management System provides a comprehensive solution for managing user accounts and company profiles. Features include user sign-in, dashboards, company management, employee role assignments, client support tickets, and detailed account summaries. This system is designed to ensure smooth operations and easy access to vital company information.
