👨 Arpit

PROFILE

Angular developer with 3.5+ years of experience in the software industry. Skilled in frontend development in **HTML, CSS, JavaScript, jQuery**, **Angular, Bootstrap, Ionic .** Hands-on experience in coding and implementation of complex, custom-built websites. A perceptive learner and a team player with the ability to collaborate within a multi-time zone environment.

EXPERIENCE

SARVM RETAILER APP

This is a mobile application that will enhance the shopping experience for the retailers by providing a platform for easy product management, ordering, and purchasing. Retailers are able to create accounts, log in securely, and manage their profiles.They can easily add, edit, and delete products from their catalog. They can also include images, descriptions, prices, and categorizations.The retailers can receive, confirm, and track orders placed by consumers. They can also update order statuses and provide delivery information. Monitoring their inventory levels in real-time, helping them avoid stockouts or overstock situations is a feature that is essential for the Just-In-Time scenario. Communication, Analytics and Notifications are some of the other features available through this app. I was involved in the front end design and logic implementation.

Technology: Angular, Ionic Framework, Node.js

Database: MongoDB
App URL (Android) : https://play.google.com/store/apps/details?id=com.sarvm.biz

SARVM CONSUMER APP

This is a mobile application that will enhance the shopping experience for the consumers by providing a platform for maintaining accounts, logging in securely, and managing their profiles. Consumers can browse through products, filter by categories, and view detailed product information, including images and prices. Order Placement, Order Tracking, Communication and Notifications are also features available on this app.

Technology: Angular, Ionic Framework, Node.js

Database: MongoDB
App URL (Android) : https://play.google.com/store/apps/details?id=com.sarvm.hh

A PROBLEM SOLVING APP - SAMADHAN

Involved in the front-end development of the application. It has three modules - Public, Volunteer, Admin. Worked on ionic 5 for the Public and Volunteer apps and on Angular 10 for Admin Panel on web of 5.

Technology : Ionic 5, Angular 10, Nodejs, ExpressJS

Database : MongoDB on GCP

BUY, SELL TICKETS - TicketSwap

TicketSwap is the safest way to buy and sell tickets for all types of events! Worked on the front-end development in Ionic 4 and Angular 9.

Technology : Ionic 4, Angular 9, Nodejs, ExpressJS

Database : MongoDB on AWS

App URL (Android) : https://play.google.com/store/apps/details?id=com.ticketswap.ticketswap

App URL (iOS) : https://apps.apple.com/in/app/ticketswap-buy-sell-tickets/id932337449

A SEAT BOOKING MAKEOVER APPLICATION - SWIFT MAKEOVER

Involved in the frontend architecture planning and development for the slot booking mobile app. It has two applications, one for customers and one for shop end.

Technology : Ionic using Angular, NodeJS, Firebase tools, Google Cloud Functions, GCP, Express JS

Database : Firestore

App URL : https://play.google.com/store/apps/details?id=customer.swiftmakeover.com&hl=en_IN&gl=US

SCHOOL APP - KABOODLE

A learning app with various interactive ways to learn with integrated browser games and videos. Involved in development of components and using Angular 10 with my team members.

Technology : Angular 10, NodeJS, MS SQL, AWS, Express JS

Database : MS SQL

App Link : kaboodle

EDUCATION

B.Tech (Mechanical Engineering) from Sangam University, Batch-2020, Rajasthan

SKILLS

Front End: HTML, CSS, Advanced CSS, Angular JS, JavaScript, Bootstrap, Ionic, jQuery
