Amazon (AWS)

Cloud Network Infrastructure Engineering

2014 - 2015 (1 year)

Greater Seattle Area

Worked in Amazon's Cloud Infrastructure Engineering Team responsible for Architecting and Maintaining the whole of Amazon's Production Cloud, which supports their legendary AWS (Amazon Web Services), Amazon ecommerce portals and other auxiliary services.

salesforce.com

Lead - Cloud Network Infrastructure Engineering

2013 - 2014 (1 year)

San Francisco Bay Area

Worked as a Lead Engineer in Salesforce's Infrastructure Engineering Group based out of San Francisco. This group is responsible for providing the technical direction and designing all of Salesforce's Global production Infrastructure, which is the only delivery medium for Salesforce's legendary SaaS products to a large number of enterprise customers globally. This network also supports different PaaS products.

Google

Cloud Network Infrastructure Engineering

2006 - 2013 (7 years)

Worked in Google's Infrastructure Engineering Team based out of Google HQ in Mountain View, California. My team was responsible for designing & implementing the cloud infrastructure of Google to support the whole gamut of Google services like Gmail, Google Maps, Youtube, Google Search, Google Apps, Google Plus Hangout, Google Calendar etc.

Won Google's second highest award (called OC Award) for the Google Maps project. Also won several other awards like Director's Choice Award for new designs / Architecture.

Sify Limited

Assistant Manager - Cloud Infrastructure Engineering

2000 - 2006 (6 years)

Chennai Area, India

Worked in Sify's Core Engineering Team.
