Levon Bakunts

PHP/Laravel Developer

I am Backend Developer with 4 years of experience in building scalable web applications. Proficient in creating high-quality, maintainable code. Passionate about problem-solving and delivering performant solutions.

EXPERIENCE

Frontend Developer

CodeTime

2022 June - 2022 November - Yerevan, Armenia

Developed responsive, user-friendly web interfaces using HTML, CSS, JavaScript. Collaborated with design teams to implement interactive features and optimized UI for performance across browsers and devices. Focused on enhancing user experience and ensuring high-quality code through best practices and testing.

Fullstack Developer

EDU Systems

2022 December - 2023 April - Yerevan, Armenia

Leading full-stack projects with PHP and Javascript. Designed efficient APIs, integrated third-party services, and built scalable solutions. Applied SOLID principles, OOP, and PHP features like middleware, observers, and event handling to maintain clean architecture and performance.

Backend Developer

PhenixCorporation

2023 July - 2023 October - Yerevan, Armenia

Built and maintained scalable backend systems using. Designed and integrated RESTful APIs, managed databases (MySQL), and optimized server performance. Ensured security and reliability of systems while collaborating with frontend teams to deliver seamless full-stack solutions.

Backend Developer

Evistep Enterprise

2023 October - Present - Yerevan, Armenia

Team Collaboration and Client Communication: facilitating collaborative discussions, task allocation, and regular client communication to ensure project alignment and progress updates. Project Management: Managed a comprehensive domain and web hosting management system, implementing microservices architecture, payment gateway integration, proxy service, dynamic coding with locator SDKs, and MQTT job functionality. Technologies Used: Proficient in PHP/Laravel, Stripe, GoCardless, PayPal APIs, NGINX, MQTT, and microservices architecture for scalable and modular solutions.
