Summary

As an experienced Senior JavaScript Developer, I bring a plethora of skills including proficiency in programming languages such as JavaScript, HTML, CSS, React, Node.js, and others. With a demonstrated history of managing multiple projects, excellent problem-solving abilities, and an aptitude for adapting to new technologies, I am efficient in delivering optimal web performance and front-end solutions.

Skills

- Proficient in JavaScript, HTML, CSS, React, Node.js, Angular, Vue.js, Express.js, Git, Bitbucket, SVN, MongoDB, MySQL, PostgreSQL.
- Exceptional problem-solving, debugging, collaboration skills.
- Versed with project management tools like JIRA or Trello.

Experience

Senior JavaScript Developer, Bigarmor, VA | Aug 2021 – September 2023

-Developed User Interfaces: Created interactive, responsive, and user-friendly web interfaces using Angular framework.
- Implemented Designs: Translated design mockups and wireframes into functional web page
-Coded and Tested: Wrote clean, maintainable code and conducted unit and integration tests to ensure software quality.
-Collaboration: Collaborated with backend developers, designers, and other team members to integrate frontend components with the backend
-Performance Optimization: Optimized web applications for speed and efficiency, including lazy loading, code splitting, and caching strategies
-Responsive Design: Ensured that web applications worked well on various devices and screen sizes
- Version Control: Used version control systems like Git to track changes and collaborated with team members
-Bug Fixing: Identified and resolved frontend bugs and issues in a timely manner
-Cross-Browser Compatibility: Ensured that web applications were compatible with multiple browsers
- Security: Implemented security best practices to protect against common web vulnerabilities, such as XSS and CSRF
-Documentation: Created and maintained documentation for code and processes
-Code Reviews: Participated in code reviews to ensure code quality and adherence to coding standards
-Continuous Integration/Continuous Deployment (CI/CD): Set up and maintained CI/CD pipelines to automate the deployment process
-Learning and Keeping Up-to-Date: Stayed current with Angular updates and industry trends in frontend development
-Problem Solving: Troubleshot and resolved technical issues as they arose.

JavaScript Developer, Prenda, AZ | Dec 2013 - July 2021

- Maintained the online learning platform, ensuring optimal performance.
- Collaborated with developers for server-side functionality.
- Ensured bug-free platform releases by working with QA.

Projects

- Developed a PHP website for a custom micro ATX computer company, guaranteeing compatibility.
- Created a horse racing odd-tracking web app in Node.js/React.js and developed its mobile version.

Education

- B.S. in Computer Science, Rice University (2006)
- A+, MCSE, CIW Certifications, iTec Little Rock, AR (2001)

Additional

- Proven ability to adapt to new technologies and trends.
- Efficient in managing multiple projects and meeting deadlines.
- Strong problem-solving and analytical abilities
