Objectice

- Software engineer passionate about creating impactful software solutions.
- Seeking opportunities at progressive companies to contribute skills.
- Values inclusive and diverse work environments.
- Dedicated to overcoming challenges and learning from failures for excellent outcomes.

Education

University of Engineering and Technology	2018 – 2022
Computer Systems Engineering, B.Sc (Hons)	Peshawar, Pakistan

Govt College Peshawar	2016 – 2018
Computer Science	Peshawar, Pakistan

Professional Experience

Xenova (Flutter Developer), *(Feb 2024 - Present)*

- Started at Xenova as an Associate Flutter Developer, focusing on skill development and project contributions.

AntonX (Flutter Developer), *(Mar 2022 - Jan 2024)*

- Started as an unpaid intern at AntonX, dedicating 2 years to skill development and project contributions.
- Embraced challenges in a dynamic tech environment, showing commitment to learning and growth.
- Transitioned to a Junior Developer role, gaining a strong foundation in software development and project management.
- Ready to leverage skills and enthusiasm to contribute to collaborative and innovative initiatives.
- Committed to advancing in the development career with valuable contributions.

Projects

1. Water Delivery App: ⬈

I created a water delivery app in AntonX. This app helps deliver water to homes, offices, and other places easily. I built it using Flutter, which works on many devices. And to keep track of my work, I used Jira.

2. DreaMate: ⬈

I created DreaMate, an app for interpreting dreams using AI technology. With Flutter, I built this app to be compatible across different devices (Firebase).

3. The Golden Keys: ⬈

An e-commerce app that is used for rating for businesses which are registered in this plate form also there are levels which depend on number of employees, time spent and total rating (Firebase).

4. OBD-II:

An app that can do Real-time vehicle diagnostics, detect faults in vehicles while driving and Monitor vehicle health.

5. Forest Guard:

An app that can be used to show all criminal records with their basic info and to search for them easily anytime.

Future plane

- Seeking transition to a large, leading IT company to further professional growth.
- Eager to learn from seasoned senior developers in a larger company setting.
- Confident that joining a larger company will provide invaluable hands-on experience and mentorship.
- Excited about contributing skills and dedication to a company known for innovation and excellence.

Skills

| Flutter | Dart | Firebase | **Version Control** — Git Hub | **Api Integration** | C / C++ |

| Jira | MVVM | **Third Party Integration** |
