 6. Incentive management

Skill Set Rating

Use case covered

- FP&A
- Life cycle costing
- Tender costing
- Cashflow
- Capacity Planning
- Workforce Planning

Major Achievements

- Client appreciation for all project
- Quick resolutions for problems
- Hard working.

Work Experience

Company 3:

Dec 2021 – Till Date

Multiple Solutions for Health Care company

Use cases:

1. **Trade Spent Planning:**

End to end Implementation: I had been involved in building project from scratch, requirement gathering, user story building, planning them into sprint. Technically, I have been involved in building optimal models, creating list modules and dashboards, using LIS and lists subsets. I have also worked on complex formulas and implemented quick last-minute changes.

2. **Financial Planning and Commodity Planning**

Maintenance and support: I have been working in a pre-implemented project, understanding the structure and working of the model was initially where I started with. I had been working on optimizing the model. Also, working on day-to-day maintenance activities. I worked on quick fixes for any issues that come up.

3. **Commercial Planning, Trade Planning, Sales Planning: (current)**

Development: Working on 3 projects parallelly for a client, Guiding on built and end to end development process.

Company 2:

SEP 2019 to Dec 2021

Project 1: An end-to-end implementation for a transport company.

1. **Life Cycle Costing, Tender Costing and Cash flow**

End – to – end Implementations: I had been involved in building project from scratch, requirement gathering, user story building, planning them into sprint.

I have been involved in building optimal models, creating list, modules and dashboards, using LIS and lists subsets. I have also worked on complex formulas and complex structure. I have delivered the project with-in defined timelines. Hence, we were given an opportunity to implement extended solutions, one after the other.

I have also worked on Integrating the solution.

Project 2: Maintenance and support for a food-based company.

Use Case:

1. Capacity planning

Maintenance, support and Integrating: I have been working as an integrator for the project. Easing manual loads to automated. Integration was with SAP – BW.

Company 1:

Nov 2016 – August 2019

Project 1: End to end development for Nuclear Power Plant.

Use Cases:

1. Work force planning and Financial planning:
This was a project where I was working on enhancements model and optimization also, on integration.

Project 2: End to end development for food company.

Use Case:

1. Work force planning:
I have been involved in building optimal models, creating list, modules and dashboards, using LIS and lists subsets. I have also worked on complex formulas and simple structure.

Project 3: End to end development of a case study.

Use Case:

1. Work force Planning:
POC: Developed a Proof of concepts for my company.

Cognos Project 4: Support and Maintenance for an electrical company.
