MUHAMMAD ABUBAKAR

SUMMARY

Detail-oriented developer with over one year of experience in creating and maintaining dynamic websites, web applications, and blockchain solutions. Proficient in various programming languages and frameworks, with a strong focus on user experience, responsive design, smart contract development, and decentralized applications. Proven ability to manage complex projects efficiently, ensuring timely delivery while maintaining high-quality standards and strict security protocols. Excellent problem-solving skills and a collaborative approach to working with cross-functional teams, effectively communicating technical concepts to non-technical stakeholders to facilitate seamless collaboration and innovation.
