### Project Managed

- **HART** - It's a Laravel project which is based on the concept of hunting. Landowners/Outfitters can register their property and rent them to hunters to hunt for a fixed amount of time.  
**Role** - Architecture, DB design, Flow, Requirement gathering and modules creation for delivery.
- **DryRight** - It's a Laravel project. It was previously designed with Act database and the client required it to shift it to laravel. So an already existing project which needs importing existing DB, handle it and manage the new requirement with existing lakhs of data. **Role** - Requirement gathering, Architecture design, management, delivery

### Project Developed & Managed

<b>CheQ</b>	
<b>Role</b>	Sr. iOS Developer
<b>Team Size</b>	22
<b>Description:</b> CheQ is a fintech utility app which helps a user to Assess their Credit Health , Track the Bills for their Credit Products , Pay their Credit bills with CheQ , Earn Reward points when they Pay , Burn the Rewards Points only on CheQ.	

<b>DeepNorth</b>	
------------------	--

<b>Role</b>	iOS Team Lead, Client handle, iOS development, Testing, Delivery
<b>Team Size</b>	5

**Description:** Deep North is serving AI-based insights through mobile! Deep North's customers can now quickly access key metrics on customer behaviour, operations, and safety and security through their phones. Use the main dashboard for daily insights or dive into historical data and see how foot traffic trends have changed over time. It includes all types of Graphs, Complex UI, Core Data, Pdf views, Structured code with MVC pattern.

<b>Tribe365</b>	
<b>Role</b>	Project Manager, Technical lead, Client handle, Architecture Design, iOS development, Backend flow (laravel), DB Design, Testing, Delivery
<b>Team Size</b>	10

**Description:** Tribe365 is a culture implementation program, bringing measurability and control to culture, allowing staff and companies alike to get the most out of work. Users need to login which are provided by Business consultants. Organisations can track their staff's sentiments on a daily basis. Staff can offload, can complete surveys which will help organisations to improve. It's a great app to improve your work culture in the most easy and effective way possible. It uses google graphs to show the monthly progress. It has complex and challenging UI's.

<b>Freshers App</b>	
<b>Role</b>	Project Manager, Technical lead, Client handle, Architecture Design, iOS development, Backend flow (laravel), DB Design, Testing, Delivery
<b>Team Size</b>	4

**Description:** FreshersApp is unlike any other social media app. Everyone on FreshersApp is anonymous – nobody knows who you are, nobody knows what you're posting and nobody knows how many likes you have. Every post you see on FreshersApp is from a user in your area. More relevant content, more relatable people. The FreshersApp feed is made up of posts from nearby users. Users are grouped into locales, so you're never more than 10 miles from the users on your feed. Each post remains on the feed for 24 hours before disappearing. It uses inApp Purchase to get the upgraded version.

<b>BlueData And KitRight</b>	
------------------------------	--

<b>Role</b>	Project Manager, Sr. iOS Developer(Swift).
<b>Team Size</b>	9
<b>Description:</b> These applications are basically QR and OCR code scanning applications respectively which scans various machine codes so that we can get the details for the scanned machine. Trained users can operate the machine by following instructions provided in the User directive of the scanned machine. These apps help an organization to keep track of the machines, operators and safety.
