

Himanshu Sharma

Software Developer • Backend Developer • Mobile App Developer

Institute Of Engineering Jiwaji University • 2024 Pass out

Work Experience

Flutter Intern @ Decrypton, Lucknow [↗](#)

[Link](#)

May 2023 - Aug 2023 (3 months) | Part-time

- The project is an online collaboration app between the artist and patrons to get in connection like social media - "eKalakar"
- My Role was to : Writes client side Back-end in dart, Writes Front-end screens, API consumption with Firebase, State Management (BLoC)
- Having Authentication feature ,Having two different modules specific feature for each (artist and patrons)

Skills Developed: Flutter, Dart, Firebase

Projects

Groupie [↗](#) [</>](#)

- The hybrid mobile app is developed using Flutter, leveraging Firebase for cloud storage and enabling authentication through Google. It features a group chatting functionality with real-time updates, ensuring a dynamic and interactive user experience.
- Started taking the Architecture of project and start writing the front code followed by backend integration
- Send and Recieve Data from Server interacted UI/UX

Skills Developed: Flutter, Figma, Dart, Firebase

Travelific [↗](#) [</>](#) [🌐](#)

- This mern website goal is to provide the platform for traveling enthusiasts and tour and travel agency to communicate over each other by providing their requirement and budget respectively
- Firstly i designed the idea to implement this aproch and start with making ui/ux using reactJS (Used Redux saga state management throughout the app) then by following the frontend requirement I wrote the backend in NodeJS on ExpressJS framework with MongoDB and created the desired secure apis , afterward i made the application live by deploying on render.com
- Authentication login/signup (token based API's)
- Scalable/Robust (use MongoDB atlas)
- Having admin panel mobile app (written in FLUTTER)

Skills Developed: React.js, Redux, NodeJs, ExpressJs, MongoDB, Flutter

Tagline

Coding Software's, Decoding Life

Skills

C/C++ | Flutter | NodeJs | MongoDB | ExpressJs | Github | Excel | MySQL | React.js | Redux

Education

Institute Of Engineering Jiwaji University
B.E., Computer Science Engineering (CSE) | 8
CGPA

2020 - 2024

Certifications & Courses

Mern Developer

- From the mobile app development journey i got the interest in the Backend Programming so i learned about Back-end in WEBD that was the tour & travel business website -"Travelrific " My Role was to Making API with MongoDB,CRUD, Routing , Middleware , JWT(cookies)
