

ShiYing Wang - Full-Stack JavaScript Developer Resume

ShiYing Wang

Email: wangwork112@hotmail.com

Professional Summary

Results-driven Full-Stack JavaScript Developer with over 10 years of experience designing, developing, and deploying scalable web and mobile applications. Proficient in modern JavaScript frameworks like React, Vue, and React Native for front-end development, combined with robust back-end expertise using Node.js and Express. Strong background in working with databases such as MongoDB, MySQL, and SQL Server. Adept at delivering high-quality solutions in fast-paced, agile environments.

Technical Skills

- **Front-End:** React, Vue, React Native, HTML5, CSS3, JavaScript (ES6+), Redux
 - **Back-End:** Node.js, Express, RESTful APIs
 - **Databases:** MongoDB, MySQL, SQL Server
 - **Tools & Technologies:** Git, Docker, Agile/Scrum, NPM, Webpack, Postman
 - **Cloud/Deployment:** (If applicable, e.g., AWS, Azure, Heroku)
-

Professional Experience

Senior Full-Stack JavaScript Developer

Company Name – Location | MM/YYYY – Present

- Led the development of scalable web applications using React and Node.js, improving performance by X%.
- Built and maintained RESTful APIs with Express, ensuring seamless communication between front-end and back-end systems.
- Designed dynamic user interfaces with Vue and React Native, enhancing user experience for mobile platforms.
- Optimized database queries for MongoDB and MySQL, reducing data retrieval time by X%.
- Collaborated with cross-functional teams in agile environments, participating in sprint planning and code reviews.

Full-Stack JavaScript Developer

Company Name – Location | MM/YYYY – MM/YYYY

- Developed responsive web applications using React and Vue, supporting over X concurrent users.
- Implemented server-side logic with Node.js and Express, integrating third-party APIs to extend app functionality.
- Managed data storage solutions using SQL Server and MongoDB, ensuring data security and integrity.
- Automated deployment processes, reducing release time by X% through CI/CD pipelines.

(Add more roles if applicable)

Key Projects

Project Name

- **Description:** Brief overview of the project, its goals, and impact.
- **Technologies:** React, Node.js, MongoDB, etc.
- **Role:** Designed and implemented [specific feature], resulting in [measurable outcome].

Mobile Application Development

- **Description:** Developed cross-platform mobile apps using React Native, achieving [user growth, downloads, etc.].
 - **Role:** Led UI/UX design and integrated APIs for real-time data synchronization.
-

Education

Degree (e.g., Bachelor's in Computer Science)
University Name – Graduation Year

Certifications *(Optional)*

- JavaScript Development Certificate – *Issuing Organization*
- React/Node.js Certifications – *Issuing Organization*
