Design & Testing Tools: VS Code, Postman, Photoshop, SonarQube, JIRA
Soft Skills: Agile methodology, leadership, problem-solving, client communication

Professional Experience

Senior Full Stack Developer

Atrosphere Technologies | May 2018 – Present

- Led full stack development for multiple enterprise-grade platforms using Angular and React Native
- Architected and integrated backend services using Node.js and REST APIs
- Conducted code reviews, mentored junior team members, and ensured best practices in UI/UX and performance optimization
- Managed DevOps pipelines and deployments via Azure Pipelines and Git
- Collaborated with cross-functional teams in Agile sprints to deliver product milestones

Key Projects

RetailCart 360

• Role: Full Stack Developer

• Tools: Angular, Node.js, MongoDB, Bootstrap

• Details: Designed and developed a B2B retail inventory and order management system. Implemented product catalog filtering, user role-based dashboards, and RESTful API integration for real-time stock updates. Built responsive UI and configured backend for dynamic inventory syncing.

FinTrust Banking App

• Role: Full Stack Developer

• Tools: React Native, Node.js, Express.js, MongoDB

• Details: Developed a mobile banking app with features including account summary, fund transfer, and transaction history. Ensured security compliance, JWT-based authentication, and performance optimization. Integrated with 3rd party APIs for credit scoring and loan services.

HealthSync EHR

• Role: Full Stack Developer

• Tools: Angular, Node.js, PrimeNG, Azure DevOps

• Details: Built electronic health record modules for a hospital system. Designed patient intake UI, appointment scheduling features, and integrated lab result APIs. Focused on accessibility and HIPAA-compliant data handling.
