Azruddin Shaikh

SUMMARY

With 7+ years of experience as an iOS mobile application developer, I have successfully delivered a wide range of apps, working closely with clients to meet their specific needs. My expertise includes UIKit (7 years), SwiftUI (4 years), Xcode (7 years), and Object-Oriented Programming (OOP). I am proficient in building robust, scalable, and user-friendly applications from the ground up, handling everything from concept development to final deployment. I specialize in creating smooth, responsive UIs using both UIKit and SwiftUI, while also ensuring efficient app performance and seamless integration of new features.

SKILLS
