# URMIL BHAVSAR

## SKILLS

**ANGULAR, REACTJS, NODEJS, EXPRESSJS, SQL, MONGODB**

## EXPERIENCE

### Jr. Software Developer

JUN'23 – PRESENT

**Technologies**: AngularJS, NodeJS, ExpressJS, SQL, MongoDB

**MarineCP**: Led the development of a maritime charter party platform, enabling users

(owners, charterers, brokers, admins) to trade and draft contracts. Worked on both

admin and user web apps, handling frontend, backend, and API development and

deployment on server.

**P6**: Maintained and enhanced a business risk management system, allowing users to

raise and challenge risks. Focused on system reliability, feature improvements, and

performance optimization.

Conducted technical interviews to hire MEAN stack developers and managed their

training programs to ensure readiness for project requirements.

### MERN Stack Developer

Feb'22 – MAY'23

**Technologies**: HTML, CSS, JavaScript, ReactJS, NodeJS, ExpressJS, SQL

**E-commerce Platforms**: Developed and maintained admin and user web applications

for two e-commerce sites. Worked on both frontend and backend, implementing

features like add-to-cart, wishlist, and secure checkout. Focused on performance

optimization, seamless user experience, and scalable architecture.

**Jewelry Valuation System**: Enhanced the UI and frontend functionality of a jewelry

valuation application. Enabled users to add jewelry details, including purity, weight, and

value. Delivered a polished user interface to improve usability and streamline

Operations.

**Company Website Revamp**: Led the redesign and redevelopment of the company's

website. Worked on both frontend and backend to modernize the design, improve

responsiveness, and ensure smooth performance. Contributed to creating a

professional digital presence aligned with business goals.

**Manage Services**

Developed a website for a car rental service business catering to corporate and

individual clients. This freelancing project was built using the MERN stack with a focus

on an intuitive and visually appealing user interface, responsive design, performance

optimization. Managed the entire deployment process independently, configuring

and hosting the website on a VPS server, ensuring seamless functionality and

accessibility.
