Experience

Freelance Web Developer — 2018 — Present

Delivered websites and e-commerce stores for startups and small businesses. Services include WordPress/Blogger development, payment integration, site optimization, and ongoing maintenance.

Frontend Developer — InvenEase (Project) — 2024 — 2025

Built frontend UI for a browser-based POS solution (InvenEase). Implemented responsive layouts, billing interfaces, and integration-ready components for backend connectivity.

Automation & Bots (Personal Projects) — 2023 — Present

Developed Telegram bots for trading notifications and small automation tools for clients and personal use.

Education

Secondary & Higher Secondary Education — Bardhaman (Local Board) (Completed)
