

PROFILE SUMMARY

AVP Technology over 8 years of experience in software development and leadership. Full-Stack Web Developer over 8 years of hands-on experience in designing, developing, and maintaining web applications using PHP and Node.js. Proficient in modern frameworks including Laravel, CodeIgniter, and content management with WordPress. Strong expertise in working with both relational databases like MySQL and NoSQL solutions such as MongoDB. Skilled in building scalable, secure, and responsive web applications, with a solid understanding of back-end logic, RESTful API development, and front-end integration. Adept at managing full software development life cycles, collaborating with cross-functional teams, and implementing best practices in code optimization and performance tuning.

CORE COMPETENCIES

- Node.js, Express.js, Sails.JS, Nest.JS
 - React.JS, Next.Js
 - WordPress, Laravel, CodeIgniter
 - RESTful
 - TypeScript, JavaScript
 - MySQL, MongoDB
 - CMS Integration & Workflows
 - Microservices Architecture
 - Docker & CI/CD Pipelines
 - Performance Tuning & Caching
 - Content Management Strategy
 - Team Leadership & Mentoring
-

PROFESSIONAL EXPERIENCE

Assistant Vice President - Technology – Formidium Corp. | Sep-2019 – June-2025 | GIFT City, Gandhinagar.

- **Leadership & Team Management:** Lead and mentor a team of developers, fostering a culture of innovation and technical excellence.
- **SaaS Product Development:** Spearheaded the development of a SaaS-based product, ensuring scalability, security, and high performance.
- **System Architecture & Design:** Defined and implemented modular architecture to enhance system flexibility and maintainability.
- **Business Requirement Analysis:** Collaborate with stakeholders to understand business requirements, translating them into technical solutions.
- **Sprint Planning & Execution:** Oversee sprint management, ensuring timely delivery of high-quality features while maintaining agile best practices.
- **Sprint Success & Optimization:** Continuously analyse sprint outcomes, implementing improvements for better efficiency, collaboration, and delivery timelines.
- **Code Review & Best Practices:** Conducted thorough code reviews, implemented best practices, and ensured adherence to coding standards.

Sr. Software Developer – Lynked.World | Nov-2017 – Aug-2019 | Ahmedabad

- **Software Development & Coding:** Designed, developed, and maintained scalable applications using Node.js, MongoDB, and modern web technologies.
 - **System Architecture & Design:** Defined and implemented modular and efficient system architectures to optimize performance and scalability.
 - **Business Requirement Analysis:** Worked closely with stakeholders to understand business needs, providing technical solutions that align with company objectives.
 - **Agile & Sprint Management:** Actively participated in sprint planning, backlog grooming, and sprint execution, ensuring timely and high-quality feature delivery.
 - **Collaboration & Mentorship:** Worked cross-functionally with teams to integrate new features and mentored junior developers to enhance their technical skills.
-

EDUCATION

Bachelor of Engineering, Government Engineering College, Gandhinagar, Gujarat Technological University, 2013

PROJECTS

CommonSubDoc (CSD)

CommonSubDoc (CSD) is an enterprise technology platform developed by Formidium Corp. to streamline and enhance the investor onboarding process within the investment management industry. It offers a comprehensive suite of tools designed to facilitate investor relations, monitor capital activities, ensure compliance reporting, and secure document management.

Key Features of CommonSubDoc:

Streamlined Onboarding: Simplifies the investor onboarding process, reducing time and resources required while enhancing accuracy and compliance.

Comprehensive Compliance: Provides built-in AML/KYC processing capabilities, ensuring adherence to regulatory standards and facilitating thorough due diligence.

Investor Relations Management: Offers tools for capital activity monitoring, compliance reporting, and document security, strengthening fund manager-investor relations.

Secure Document Handling: Ensures the security and integrity of sensitive documents through robust encryption and access controls.

User-Friendly Interface: Features intuitive dashboards and digital workflows that improve the accuracy and efficiency of compliance verification.

Vault

Vault, which is a cloud-based Software as a Service (SaaS) solution designed to revolutionize content management with unparalleled security and ease of use. Tailored for businesses of all sizes, Vault simplifies file sharing, version control, and real-time collaboration while ensuring compliance with industry standards

Key Features of Vault:

Secure File Sharing: Facilitates the safe exchange of documents within and outside the organization, ensuring data integrity and confidentiality.

Version Control: Maintains a comprehensive history of document revisions, allowing users to track changes and revert to previous versions if necessary.

Real-Time Collaboration: Enables multiple users to work on documents simultaneously, enhancing teamwork and productivity.

Compliance Assurance: Adheres to industry standards and regulations, providing organizations with confidence in meeting compliance requirements.

User-Friendly Interface: Designed with an intuitive interface that simplifies content management processes, making it accessible for users with varying technical expertise.
