### ABOUT ME

---

Hello! My name is Andrew and I am a web designer. In design since 2015 in various fields. In 2015, I first started working with graphic editors, which led me to this profession. Having mastered the basic knowledge of web design, I began to develop in this direction, gaining experience in freelancing.

By the fall of 2019, I received the first website design project for a recording studio. Since then, I have found more than 20 projects on sites of varying complexity, worked with different organizations on the design of SMM, printing, with web studios and learned to communicate with various people, developing soft skills.

In May 2022, I moved to Uzbekistan, Tashkent, and a month later I went to work at Solutions lab holding, a Paymart company engaged in installment and marketplace in Tashkent, where I stayed until 08/10/2022

My next job was CDTI Marketing, where I designed and created visuals for internal product websites, as well as social media and print design.

Since November 2022, I have been freelancing again, and since then I have created several projects, including a website for a furniture store in Dubai.

### HOBBY

---

Sports, travel, literature, knowledge, cinema, communication with people
