○ hassimalik

Frontend developer who turns ideas into smooth, interactive web experiences. I build responsive, high-performance applications using **React, Tailwind, GSAP, and Next.js**, bringing creativity and clean code together. I focus on creating interfaces that are not only functional but also intuitive and visually engaging. I love **solving challenging problems**, **optimizing user experience**, and making websites that leave a lasting impression. Every project I take on is an opportunity to merge **design, code, and functionality** into seamless digital experiences.

WORK EXPERIENCE

Frontend React JS Developer
AspireX LLC
Nov 2025 - Feb 2026

Roles & Responsibilites

- *Gained strong knowledge of **core React and Next.js concepts**, including component structure, **routing,** rendering, and **performance optimization**, with practical experience using **Webpack** and **Turbopack.***
- ***Converted Figma designs** into responsive, **production-ready UI using React and Next.js,** built real-world functionality, **fixed UI breakage**, resolved errors, and handled project configurations.*

Web Developer Intern
DySofTech
Apr 2025 - Aug 2025 | Remote

Roles & Responsibilites

- *Completed a remote **internship** at DySofTech, actively contributing to real-world **frontend** projects under professional mentorship to strengthen **React.js** skills and practical web development expertise.*
- *Mastered industry best practices including responsive design, **clean code** principles, and **modern UI** implementation while collaborating remotely with the team—sharpening virtual communication, project management, and agile workflows in a distributed environment.*
