## Product Builder | Android, Web & AI Integration

Portfolio: <https://cybrblq.github.io/portfolio->

### Professional Summary

Product builder focused on helping startups, founders, and SMEs transform ideas into production-ready products. Combines software engineering, product thinking, and project leadership to deliver Android apps, web platforms, AI-powered tools, SDK integrations, and MVPs. Experienced working across the full product lifecycle from discovery and planning through development, deployment, and iteration.

### Core Competencies

Android Development (Kotlin), React Native, Web Development, AI Integration, API Development, Supabase, Product Management, MVP Development, Technical Project Leadership, Startup Product Strategy, SDK Development & Integration

### Selected Projects

#### MoodifySDK

Production Android after-call advertising SDK. Designed for integration into third-party Android applications. Licensed commercially while retaining intellectual property rights. Public licensing positioned at \$1,500.

#### VoiceBox

Android application featuring a live MoodifySDK integration with after-call overlays and AdMob mediation. Served as the first licensed deployment of the SDK and was published on Google Play.

#### PaperClip

AI-powered Android bookmark manager built using Kotlin, Jetpack Compose, Room Database, and Groq API integration. Focused on intelligent organization and retrieval of saved content.

#### Circle

AI communication delegation platform for founders. Built using React Native, Expo, Supabase, and Claude API. Designed to reduce communication overhead and improve founder productivity.

### Professional Positioning

Works with early-stage startups, founders, and growing businesses that need one reliable builder capable of handling product planning, software development, AI integration, and technical execution without coordinating multiple contractors.

### Services

- Android App Development
- Web Application Development

- AI Product Integration
- MVP Development
- Product & Project Management
- SDK Development and Integration

## **Tools & Technologies**

Kotlin, Jetpack Compose, React Native, Expo, Supabase, Claude API, Groq API, Android SDK, REST APIs, Git, Product Discovery, Agile Delivery, Startup MVP Design
