

SHASHI KUMAR

Solutions Architect | Full Stack Developer | Team Lead

[Vadodara, Gujarat] | [+91 83207 43499] | [SHASHI.PCST@GMAIL.COM]

PROFESSIONAL SUMMARY

Solutions Architect and Full Stack Developer with 12+ years of experience designing and delivering scalable web applications, ERP systems, CRM platforms, and B2B/B2C marketplaces. Deep expertise in Symfony, Laravel, Node.js, and RESTful/microservice architecture, with a track record of defining technical roadmaps, selecting technology stacks, and leading development teams through the full SDLC. Skilled at integrating complex third-party systems, payment gateways, ERP/CRM sync, and supplier/distributor platforms, into secure, production-grade applications.

TECHNICAL SKILLS

Languages & Backend: PHP, Symfony, Laravel, CodeIgniter, Node.js, Express.js

Frontend: React.js, JavaScript, jQuery, HTML5, CSS3,

Databases: MySQL, PostgreSQL, MongoDB, Redis, Solr

Architecture: Microservices, SaaS-based Architecture, System Design, RESTful & SOAP APIs, Solution Architecture, RBAC

Integrations: Stripe (incl. Stripe Connect), PayPal, Authorize.net, CardPointe, QuickBooks, AWS S3, Socket.IO, Firebase, Razor Pay

Tools & Practices: Git, SVN, Jira, Trello, Asana, Code Review, Team Mentoring, SDLC

PROFESSIONAL EXPERIENCE

[Codiconic] — [Co-Founder & Team Leader]

Feb 2023 – Present

[Vadodara, India / Onsite]

[Nupur Software] — [Team Leader]

Jan 2022 – Jan 2023

[Vadodara, India / Onsite]

[Office Beacon LLC] — [Software Engineer]

Jun 2015 – Jan 2022

[Vadodara, India / Onsite]

[Rockers Technology] — [Software Engineer]

Feb 2013 – Jun 2015

[Vadodara, India / Onsite]

KEY PROJECTS

Led architecture and development for enterprise web platforms across CRM, ERP, e-commerce, and fintech domains, managing development teams and owning technical decisions from requirements through deployment.

Multi-Vendor B2B/B2C Promotional Products Platform — *Symfony, MySQL, MongoDB, Solr, Redis, REST/SOAP APIs*

- Architected a microservices-based multi-vendor marketplace connecting suppliers, distributors, and buyers, covering RFQ management, product catalogue, cart/checkout, and order management.
- Built real-time catalogue and inventory sync integrations with PromoStandard, Sage, and ASI/ESP, eliminating manual product-data entry across platforms.
- Implemented secure payment and invoicing workflows (PayPal, Authorize.net, CardPointe) plus live shipping-rate integrations with UPS and FedEx.
- Owned database design and delivery of user management, search, and quote/RFQ modules.

Enterprise CRM Platform — *Laravel, MySQL, Blade, jQuery*

- Built core CRM modules — quote management, task/activity tracking, and role-based access control — for a 360-degree customer management platform serving B2B and B2C use cases.
- Developed real-time, bi-directional customer/user data sync between the CRM and an external ERP system.
- Integrated Office 365 (OAuth) for unified email and calendar functionality within the CRM.

Fundd.org — Crowdfunding & Fundraising Platform — *Laravel, MySQL, Blade*

- Contributed to a crowdfunding platform supporting campaign creation, secure donation processing, and real-time donor engagement and progress tracking.
- Helped build multi-role architecture (organizers, donors, admins, moderators) and payout/transaction-tracking features supporting escrow-style fund release.

Morningstar — ERP Inventory & Order Management System — *Laravel, MySQL, jQuery*

- Delivered end-to-end inventory and order management covering multi-warehouse stock visibility, GRN (goods receipt) processing, and Gate Pass dispatch controls.
- Built vendor and procurement management modules, including purchase order tracking and payment reconciliation.
- Administered role-based access, system configuration, and supply-chain performance dashboards.

Folio.law — Legal Practice & Matter Management Platform — *Node.js, Express.js, React, MySQL, MongoDB, Socket.IO, AWS S3, JWT*

- Designed and built Matter, Contact, Member, Task, and Document Management modules using Node.js, Express.js, Sequelize ORM, and React.
- Implemented JWT-based authentication, subscription-based access control, and AWS S3 document storage.
- Developed real-time notifications and activity tracking via Socket.IO, plus advanced search and cross-entity relationship mapping.

ADDITIONAL PROJECTS

- My Fittest Club — Community fitness platform: built Node.js APIs, Laravel admin panel, Socket.IO real-time notifications, Razor Pay payments, and Strava/Zoho CRM data sync.
- Staylance — Global work-travel exchange platform: developed Symfony backend and React.js frontend with Google Maps API integration.
- My Hour Tracker — Cloud-based workforce attendance system with GPS/QR check-in; integrated Stripe recurring billing and QuickBooks timesheet sync.
- Copbee — Document management platform built on Symfony and React with role-based access control and REST APIs.

EDUCATION

BACHELOR OF TECHNOLOGIES

2008 – 2012

Patel College of Science & Technology Bhopal, MADHYA PRADESH
