## ■ SUMMARY TEXT — COPY THIS INTO THE SUMMARY FIELD (1,698 / 3,000 chars)

### PRODUCTION EXPERIENCE:

Deployed a full-stack AI voice receptionist for a healthcare clinic using Vapi AI and ElevenLabs. The agent checks Google Calendar in real time, books appointment slots, collects patient details, and sends WhatsApp confirmation — zero human involvement for routine bookings.

### WHAT I BUILD FOR YOU:

- Inbound AI Receptionist — answers every call, handles FAQs, books appointments, routes complex calls to humans. Built on Vapi AI or Retell AI with ElevenLabs premium voices.
- Outbound Lead Qualification Agent — calls your lead list automatically, asks your qualification questions, scores prospects, books demos for hot leads, logs everything to CRM.
- Follow-Up Calling Agent — calls back web form submissions within 60 seconds. Eliminates slow response time that kills lead conversion.

### INTEGRATIONS I DELIVER:

- CRM: GoHighLevel, HubSpot, Salesforce, Pipedrive
- Calendar: Google Calendar, Calendly | Automation: n8n, Make.com, Zapier
- Voice: ElevenLabs, Deepgram STT | Telephony: Twilio, Vonage | SMS follow-up after every call

**WHO HIRES ME FOR THIS:** Medical and dental clinics. Real estate agencies. Law firms. HVAC and home service companies. Recruitment agencies. Any business losing revenue to missed calls.

**TECH STACK:** Vapi AI · Retell AI · ElevenLabs · Deepgram · GPT-4 · Twilio · n8n · GoHighLevel · Google Calendar API · LangGraph · Python · PostgreSQL · Docker

- Available for both one-time builds and ongoing retainer engagements covering optimization, new call flows, and integration maintenance.

■ **SKILLS TO CHECK**

[Artificial Intelligence] [API Development] [Chatbots] [Python] [Twilio] [Voice-Overs] [Web Development] [Software Development] [Docker Software] [Cloud Computing] [PostgreSQL] [Microsoft Azure] [Next.js] [JavaScript]

SKILLS TO UNCHECK (if pre-selected): Java · Java Spring · Embedded Development · Financial Services · Desktop Applications · Open Source · Operating Systems

**TYPES OF AGENTS I BUILD:**

- I design and build autonomous AI agents that plan, reason, execute multi-step tasks, and self-correct — without human supervision at every step. This is not chatbot work. AI agents pursue goals; chatbots answer questions. The business value difference is significant.
- Research Agents — autonomously searches multiple web sources, extracts key intelligence, generates structured reports. Replaces 2–4 hours of manual research per lead.
- Document Processing Agents — reads PDFs, contracts, invoices, medical records. Extracts structured fields, validates against your rules, outputs to your database. No manual data entry.
- Lead Qualification Agents — monitors inbound leads, scores them against your criteria, drafts personalized outreach, escalates hot leads. Fully autonomous from capture to first reply.
- Multi-Agent Orchestration — multiple specialized agents using LangGraph stateful graph architecture. One researches, another drafts, another reviews, another sends. Production-ready.

<b>PRODUCTION WORK:</b>	Built autonomous research agent using LangGraph and GPT-4 — takes a company name, searches the web, cross-references data, extracts business intelligence, and saves structured output to PostgreSQL — fully without human intervention.
<b>TECH STACK:</b>	Python · LangGraph · LangChain · CrewAI · GPT-4o · Claude API · FastAPI · PostgreSQL · Pinecone · LanceDB · Docker · AWS · GitHub Actions CI/CD
<b>CERTIFICATIONS:</b>	AWS Certified Solutions Architect · DataCamp AI Engineer for Developers (April 2026) <ul style="list-style-type: none"> <li>• Available for long-term retainer engagements building, expanding, and maintaining AI agent systems.</li> </ul>

### ■ SUMMARY TEXT — COPY THIS INTO THE SUMMARY FIELD

• I personally deployed a WhatsApp AI chatbot for a real healthcare clinic currently handling real patient bookings. Full RAG pipeline, LLM tool calling via Groq Llama 3.3 70B, LanceDB vector search, bilingual Urdu/English NLP, Google Calendar booking, Docker on Fly.io with GitHub Actions CI/CD. This is not theoretical. I replicate this for your business.

**THE PROBLEM I SOLVE:** Your front desk answers the same 20 questions 50 times a day. WhatsApp messages sit unanswered for hours. Every unanswered message is a patient lost to a competitor. I eliminate this entirely.

**WHAT THE SYSTEM DOES:**

- Answers patient questions 24/7 in plain natural language
- Checks Google Calendar in real time — books, reschedules, and cancels appointments
- Sends WhatsApp confirmation immediately after booking
- Sends automated reminders 24 hours and 2 hours before appointments
- Answers FAQs from your own clinic documents using RAG — never gives wrong information
- Admin dashboard showing all bookings and conversation logs

**LANGUAGES:** English · Arabic · Urdu · Any language via GPT-4

**CHANNELS:** WhatsApp Business API (primary) · Web widget · Telegram (optional)

<b>WHO I BUILD FOR:</b>	Medical clinics · Dental practices · Physiotherapy · Telehealth · Law firms · Beauty salons · Coaching businesses
<b>TECH STACK:</b>	Python · WhatsApp Business API · GPT-4 · LangChain · Groq AI · LanceDB · Google Calendar API · PostgreSQL · Docker · Fly.io · GitHub Actions

#### ■ SKILLS TO CHECK

#### ■ SUMMARY TEXT — COPY THIS INTO THE SUMMARY FIELD

• I take founders from idea to deployed AI product — production-grade, not a prototype that breaks under real users. I have shipped 10+ scalable REST APIs at enterprise level with 95% client satisfaction, built data pipelines processing 10,000+ records daily at Mavericks United, and deployed AI-integrated web applications with real users in production.

**WHAT I BUILD:**

- AI-Powered SaaS Platforms — multi-tenant apps with GPT-4 or Claude at the core. JWT auth and RBAC. Stripe billing. Rate limiting. User dashboards. Admin panels. REST API. AWS or Azure deployment.
- AI Web Applications — single-purpose AI tools built fast: chat with PDF, company research generators, AI contract reviewers, AI proposal generators. End-to-end: React/Next.js, FastAPI, LLM integration, vector database, PostgreSQL, deployed on Vercel or AWS.
- Full-Stack REST APIs — production APIs with Node.js/Express or FastAPI. JWT auth, PostgreSQL, proper error handling, rate limiting, input validation, full API documentation.

**CERTIFICATIONS:** AWS Certified Solutions Architect · Microsoft Certified Data Analyst Associate · DataCamp AI Engineer for Developers (April 2026)

**FRONTEND:** React 18 · Next.js 14/15 · TypeScript · Tailwind CSS · shadcn/ui

**BACKEND:** Node.js · FastAPI · Python · PostgreSQL · Redis

**AI LAYER:** GPT-4 API · Claude API · LangChain · LanceDB · Pinecone

**CLOUD / DEVOPS:** AWS · Azure · Vercel · Fly.io · Docker · GitHub Actions CI/CD

#### ■ SKILLS TO CHECK
