

GURU.COM — DEDICATED RESOURCE

Full Stack AI Web Developer · Muhammad Waqar UI Mulk · May 2026

React · Next.js · Node.js · GPT-4 · FastAPI · PostgreSQL · AWS · Docker

■ FIELD-BY-FIELD — COPY EXACTLY INTO GURU FORM

NAME OF DEDICATED RESOURCE	Muhammad Waqar UI Mulk
TITLE / POSITION	Full Stack Developer
CATEGORY	Programming & Development
SUBCATEGORY	Programming & Software
HOURLY RATE	\$55/hr (type 55 in the \$ box)
MINIMUM HIRING DURATION	Ongoing
UPLOAD PHOTO	Your professional headshot — same photo used on main profile
UPLOAD RESUME	Upload your 1-page resume PDF

■ SUMMARY TEXT — COPY THIS ENTIRE BLOCK INTO THE SUMMARY FIELD (2,741 / 3,000 chars)

I build production-grade AI web applications and full-stack platforms — not fragile prototypes that break under real users, but products built to scale from day one. I have shipped 10+ REST APIs at enterprise scale with 95% client satisfaction at BestDigitalAgency.tech, built data pipelines processing 10,000+ records daily at Mavericks United, and deployed AI-integrated web applications with real users in production. That engineering discipline goes into every project I take.

WHAT I BUILD:

- AI-Powered SaaS Platforms — multi-tenant web applications with GPT-4 or Claude at the core. User authentication with JWT and role-based access control. Subscription billing with Stripe. Rate limiting and API key management. User dashboards and admin panels. REST API with documentation. Cloud deployment on AWS or Azure. Examples: AI writing tools, AI document analyzers, AI research platforms, AI lead scoring tools, AI customer support dashboards.
- AI Web Applications — single-purpose AI tools built fast. Chat with your PDF. Company intelligence generator. AI contract reviewer. AI resume analyzer. AI proposal generator. Built end-to-end: React or Next.js frontend, FastAPI or Node.js backend, LLM integration, vector database for semantic search, PostgreSQL for structured data, deployed on Vercel or AWS.
- Full-Stack Dashboards with AI Chat Interface — business intelligence dashboards where users type a question in plain English and get an answer from their own data. Built with GPT-4 function calling for natural language database queries, React/Next.js frontend, FastAPI backend, and PostgreSQL.

	<ul style="list-style-type: none"> • REST API Development — production APIs built with Node.js/Express or FastAPI. JWT authentication, PostgreSQL with proper schema design, error handling, rate limiting, input validation, and full OpenAPI/Postman documentation. Microservices architecture where needed. • AI SaaS MVP for Startups — from idea to deployed product in 3–6 weeks. Clean, documented codebase you fully own. CI/CD from day one. Authentication, database, API, and cloud deployment included. No handover surprises.
TECH STACK:	<ul style="list-style-type: none"> • Frontend: React 18 · Next.js 14/15 · TypeScript · Tailwind CSS · shadcn/ui • Backend: Node.js · Express · FastAPI · Python · REST API · GraphQL • AI Layer: GPT-4o API · Claude API · LangChain · LanceDB · Pinecone · OpenAI Embeddings • Auth & Billing: JWT · OAuth 2.0 · NextAuth · Stripe • Database: PostgreSQL · Redis · Supabase · MongoDB • Cloud & DevOps: AWS (EC2, S3, Lambda, RDS) · Azure · Vercel · Fly.io · Docker · GitHub Actions CI/CD
CERTIFICATIONS:	AWS Certified Solutions Architect · Microsoft Certified Data Analyst Associate · DataCamp AI Engineer for Developers (April 2026) · DataCamp AI Engineer for Data Scientists (May 2026)
WHAT YOU GET:	Clean documented codebase you own completely. Production deployment with CI/CD pipeline. Authentication system with role-based access. Database with proper relational schema. REST API with documentation. 30-day support after delivery. Code structured for a developer to extend after handover.

■ **SKILLS — CHECK THESE BOXES IN THE GURU FORM**

CORE AI & DEV	[Artificial Intelligence] [API Development] [Web Development] [Software Development] [Chatbots]
LANGUAGES & FRAMEWORKS	[JavaScript] [Python] [Next.js] [Java] [Java Spring]
INFRASTRUCTURE	[Docker Software] [Cloud Computing] [Microsoft Azure] [Amazon Web Services] [PostgreSQL]
OTHER	[Data Extraction] [Desktop Applications] [Open Source] [Programming] [General / Other Programming & Software]

UNCHECK if pre-selected: Book Writing · Books · CGI · C# · C++ · Embedded Systems · Financial Services · GIS · Go Programming · Inbound Marketing · Object-Oriented Programming · Objective-C · Perl · Point of Sale Solutions · SQL · Unix · Version Control · Virtual Reality · Voice-Overs · Web Scraping · XHTML · XML

■ **WHO IS LOOKING FOR THIS RESOURCE — TARGET BUYERS**

BUYER TYPE	WHAT THEY NEED FROM YOU
Startup Founders	Need an MVP built fast and right. Want AI features from day one. Cannot afford to waste 3 months on a prototype that fails under real traffic.
SaaS Product Managers	Need LLM integration added to an existing product. Need new AI-powered features shipped quickly with proper architecture.
Small Business Owners	Want an AI tool built for their specific workflow — document analysis, internal search, report generation, customer-facing AI chat.

Marketing & Agency Leads	Need AI content tools, AI research dashboards, or AI-powered client portals built on React/Next.js with a clean UI.
Enterprise Teams	Need a standalone AI web application or dashboard built alongside their existing systems with proper API design and security.

■ FINAL CHECKLIST BEFORE HITTING SAVE

ITEM	ACTION
■ Rate set to \$55	Type 55 in the \$ field — not 280, not 40
■ Duration set to Ongoing	Select Ongoing from the dropdown
■ Photo uploaded	Professional headshot — plain background, direct eye contact
■ Resume uploaded	1-page PDF covering experience, certifications, tech stack
■ Summary copied	All text from the blue box above pasted into the Summary field
■ Title selected	Full Stack Developer — select from dropdown or type it
■ Category selected	Programming & Development → Programming & Software
■ Skills checked	All skills from the 4 categories above are ticked
■ Wrong skills unchecked	Remove any irrelevant pre-ticked skills listed in the note above
