WORK EXPERIENCE

Senior Developer

As a Senior Software Developer, I am working across the full stack using ASP.NET / .NET Core, Node.js with Express, MERN stack, and PHP, along with modern frontend frameworks such as React.js, Vue.js, Angular, and Next.js. My expertise includes API development, complex SQL queries, MS SQL Server and MySQL, server handling, hosting, CDN setup, and performance optimization, enabling the delivery of secure, high-performance applications with consistent client satisfaction.

PROJECTS :

1. POS

□ Environment : Asp.net

□ **Project Description: POS System**

The POS System is a robust point-of-sale solution designed for efficiency in sales and inventory management. It features a comprehensive dashboard displaying sales charts, purchase tracking, and top-selling products. With functionalities like invoice generation, barcode scanning, and multiple payment methods, the system accommodates various user roles, including admin, manager, and employee, ensuring streamlined operations for both online and mobile use.

□ **Technologies & Stack:**

ASP.Net Core 6, MongoDB, HTML, CSS, Bootstrap, AJAX, RedQuery (for optimization), JavaScript, jQuery

2. FEEDELS

□ Environment : Asp.net

□ **Project Description :** Feedles is a comprehensive hotel review and booking platform designed to offer users a seamless experience in reviewing and booking accommodations. The system incorporates a range of functionalities typically found in review and booking websites, providing a robust solution for managing hotel reviews and reservations.

□ **Role :** Developed and implemented various features and functionalities to enhance user experience and streamline the review and booking processes. Ensured the platform's scalability and performance through effective use of ASP.NET MVC frameworks.

3. CRM

□ **Tech Stack:** ASP.NET Core 3.1, MSSQL, AJAX, JavaScript, CSS, jQuery, Red Query, HTML, Bootstrap

□ **Project Description :** The CRM system is a comprehensive platform designed for managing company operations and user interactions. It features a range of functionalities including user authentication (login and sign-up), document creation, PI generation, shareholder and director management, and team oversight. The system also supports invoicing, payment receipts, support tickets, document checklists, and notifications to streamline business processes.

□ **Role :** Developed and integrated various features to enhance user management and company operations, including document handling and team management. Implemented a responsive user interface using modern web technologies, ensuring a seamless and efficient user experience.

PROJECTS

4. JIO SUPPLY

□ URL : www.jiosupply.com

□ Environment : Asp.net

□ Project Description : Jio Supply is an e-commerce web application designed to ordering products online. The platform streamlines procurement processes by providing a user-friendly interface for managing product orders and registrations.

□ Role : Developed custom functionalities, including tailored notification systems, email integrations, and complex shipping calculations. Implemented features and enhancements according to specific client requirements, ensuring a seamless and optimized user experience.

5. E-com platform using Nop-Commerce

□ Environment : Nop-Commerce (.NET)

□ Project Description : Developed an e-commerce web application designed to ordering products online. The platform streamlines procurement processes by providing a user-friendly interface for managing product orders and registrations.

6 Custom Designed WordPress Website

□ Tech Stack: WordPress, PHP, HTML, CSS, JavaScript, jQuery, MySQL

□ Project Description : This project involved designing and developing a fully customized WordPress website tailored to meet specific client needs. The website features a unique design and functionality, crafted to enhance user engagement and align with the client's brand identity. Key elements include a responsive layout, custom theme development, and integration of various plugins to support additional features.

□ Role and Responsibilities : Designed and developed a WordPress theme to match the client's branding and design specifications. Implemented custom functionality and plugins to meet unique business requirements and enhance user experience. Ensured the website's responsiveness and compatibility across various devices and browsers. Conducted performance optimization and provided ongoing support to maintain website functionality.
