Bohdan Palamarchuk

Frontend Developer (React, TypeScript) | Scalable Web Applications
| Backend: Python (FastAPI, Django)
Odessa, Ukraine

Summary

Frontend Developer (React, TypeScript) building scalable and high-performance web applications. Focused on clean architecture, reusable components, and modern UI/UX with Tailwind CSS and Framer Motion. Developing real-world projects: dashboards, admin panels, and PWA applications with full frontend logic and API integration. Expanding into backend development with Python (FastAPI, Django) to become a full-stack engineer. Tech Stack: • React, TypeScript, Tailwind CSS • Framer Motion, Vite • REST API, Git • Python, FastAPI, Django Open to junior frontend and full-stack opportunities.

Experience

Personal Projects

1 year 2 months

Automation Developer

December 2025 - Present (6 months)

- Developed automation system for managing browser profiles using Octo Browser API
- Built scripts for automating workflows including account management and task execution
- Integrated browser profile control via WebSocket and API endpoints
- Designed scalable architecture for running multiple automation scenarios
- Implemented task orchestration and execution logic using Python

Frontend Developer

April 2025 - December 2025 (9 months)

- Built scalable frontend architecture using feature-based structure
- Developed modern UI with React, TypeScript, and Tailwind CSS
- Implemented authentication, routing guards, and team management system
- Integrated REST API using React Query and Axios
- Focused on clean code, reusable components, and performance optimization

Education

Національний університет «Одеська політехніка»

Baccalauréat, Computer Science · (December 2024 - May 2028)
