

A ROZAR

Senior MERN Stack Developer | Full Stack Engineer

Professional Summary

A Rozar is a highly experienced Senior MERN Stack Developer with over 10+ years of professional experience delivering scalable web and mobile application solutions for both domestic and international clients. He possesses strong expertise in modern JavaScript technologies including Node.js, React.js, Vue.js, Angular, and React Native, with deep knowledge of full-stack application architecture, API development, cloud integration, and enterprise-level software solutions. He has extensive experience in developing dynamic web applications, SaaS platforms, CRM systems, eCommerce websites, and cross-platform mobile applications. Skilled in MongoDB, MySQL, JavaScript, TypeScript, PHP, Laravel, CodeIgniter, HTML5, CSS3, JSON, jQuery, and REST API integrations. A Rozar is also knowledgeable in AI-powered technologies such as ChatGPT, Gemini AI, and modern automation workflows. His technical leadership, problem-solving ability, and client-focused approach have helped businesses build scalable and innovative digital products.

Technical Skills
