

Iyanu Oluwagbemiro

ohhdotss | AI Automation & Workflow Development

PROFESSIONAL SUMMARY

AI Automation Engineer specializing in building intelligent, scalable workflow systems that eliminate repetitive tasks and connect business tools. Experienced in designing AI agents, chatbots, API integrations, and end-to-end automation pipelines with a strong focus on reliability, error handling, and data validation.

CORE SKILLS

- Artificial Intelligence & AI Agent Development
- Automation Engineering & Workflow Design
- API & Webhook Integration
- Chatbot Development
- JavaScript & Python
- JSON & Structured Data Processing
- SQL & Database Integration
- Data Extraction & Processing

SERVICES

- AI Agent & Chatbot Development
- Workflow Automation & Optimization
- API & Webhook Integrations
- CRM & Business Process Automation
- Lead Generation & Qualification Systems
- Document & Data Extraction
- Notification & Multi-Step Workflow Systems
- Automation Maintenance & Troubleshooting

APPROACH

I design and implement workflows that connect CRMs, databases, websites, forms, email systems, spreadsheets, AI models, and other business applications through APIs, webhooks, and structured data such as JSON. Every system is built with proper logic, error handling, data validation, and testing to ensure reliability at scale. I can also take over existing automation projects, identify bottlenecks or failures, and improve their performance.

AVAILABILITY

Available for fixed-scope automation projects as well as ongoing, dedicated automation development, maintenance, and support.
