Firebase

Supabase

MongoDB

SQLite

REST APIs

Provider

GetX

Git & GitHub

UI/UX Design

WORK EXPERIENCE

Flutter Developer Intern

4 Months

Edify

- Developed and optimized cross-platform mobile applications using Flutter and Dart.
- Integrated REST APIs and handled structured JSON data payloads seamlessly.
- Translated UI/UX wireframes into functional, highly responsive app screens.

Mobile App Development Intern

May 2026 – June 2026

CodeAlpha

- Built and deployed mobile applications within agile timelines using Provider/GetX.
- Utilized Firebase core services for authentication and real-time data persistence.

PROJECTS

Smart Student Helper App

Designed an all-in-one utility app for students to efficiently manage tasks, assignments, notes, and local notifications.

Flashcard Quiz App

Developed an interactive application for users to create and manage flashcards with fluid state transitions.

Smart Tour App

An interactive travel platform integrating public map APIs to recommend real-time tour spots.

Random Quote Generator

A lightweight app utilizing async REST API fetching to render quotes dynamically.
